Lumberjack Idea Used in Summer Sweaters

Knitted outerwear is to be worn by the summer girl. The illustration shows the "lumberjack" idea in knitted fibre silk of red and white, for wear with or without a blouse.

Get Correct Size When Buying Silk Stockings

Silk hosiery economy begins at the store counter. Getting the correct size is important to prevent strain. But getting a sufficiently large size does not mean that you must get an excess of material and have a bulging looseness around the ankles.

Why is it that so many women think their stockings must fit them skin-tight, just like their gloves? This is at the root of much of the stockings dissatisfaction, for after wearing a pair of tight-fitting stockings a few days invariably the big toe begins pushing its way right through the end. When every woman learns that a stocking should be at least a quarter of an inch longer than the foot to give the right kind of wear and service, not only will stockings look better, but they will give greater service. Skin-tightness spells garter runs and destructive "ladders."

For instance, if you are a woman who always takes a nine size, and you discover that it fits at all snugly over the toes, the next time you go to buy stockings you should ask for a nine and one-half. This will enable you to get the service out of your hosiery to which you are entitled, at no sacrifice whatever in good looks or appearance.

It is very important to get a stocking that fits the leg as well as the feet, though perhaps not many women remember that point when shopping for hosiery. Some women have the type of leg which begins to enlarge very quickly just above the knee. For her there is a type of stocking designed that is wider above the knee just where the extra fullness is required. And for the very tall woman there are stockings which are elastic at the top, and which will fit well on the leg. There are even "out-sizes" of hosiery which may be obtained by the woman of radically different proportions, and no one can estimate what these mean in increased wear, as well as comfort and fit.

To lessen the annoyance of "ladders" it is well to select silk stockings with a garter-run-stop, sometimes called anti-run-backs or ravel-stops. It is a device for arresting any "runs" caused by the garters in the tops, before they get down into the body of the stocking. It is usually located just below the garter-top, which is a double thickness of the fabric, designed to give elasticity and greater strength to the tops of the stockings. In silk stockings the top is frequently made of mercerized cotton, which gives greater resistance to strain than does the silk.

Keep Scalp Healthy to Have Beautiful Hair

No matter what its condition may be—whether oily or dry and brittle—constant scientific care will bring life and vitality and silken sheen to your hair.

"Steal a half hour weekly from your crowded life to pay tribute to the value of beautiful hair. This half hour will keep your scalp healthy and relieve you of worry about oiliness or about dry, lusterless hair. First, brush through to the scalp to loosen dust or dandruff; then, parting the hair at intervals, rub well into the scalp with a bit of absorbent cotton, some good cleansing, nourishing tonic.

"A brisk rubbing of scalp and hair with a soft towel removes excess tonic and then you are ready for the massage. Begin at the nape of the neck and, with a firm, circular movement of the fingers, work over the entire scalp—lifting, pressing and kneading.

"This process absorbs most of the tonic, and the final brushing—upward, outward—carries it to the ends of the hair."

Hat Trimmings

The new aigrette, which is not made of real feathers, trims many satin hats. Black and colored hats in panne and velvet are also extensively feather-trimmed. One of the new big black panne hats with poke brim is trimmed with a bunch of aigrettes on the left side. A golden brown panne is used for a wide-brimmed hat trimmed with glycerin feathers of the same color.

MUCH LIKE CAMERA IS THE HUMAN EYE

Optic, However, Infinitely Superior in Operation.

Quite simply, the eye is a camera, with a series of lenses arranged in a dark chamber; the iris serves as a shutter, and the object of the whole apparatus is to form on the retina—the sensitive plate at the back of the eye—an image of the object photographed, says a writer in My Magazine, London.

When a beam of light comes from the object it passes through the cornea and other layers of the outer part of the eye. All of these substances are rather complicated. But think what happens.

An ordinary photographic camera needs painstaking adjustment in order to obtain clear images of near or far objects. An opera glass must have its lenses screwed backward and forward. So must a telescope, in a much more prodigious way. But the eye focuses itself on near or distant objects without winking. It is as quick as thought. This is what is called the eye's power of accommodation.

What the eye does is first to contract the pupil, making it smaller when looking at a near object, and then to alter the front surface of the lens, making it more curved, or, let us say, more convex. When the eye shifts its gaze from near to distant objects the eye lets the front surface of its principal lens get a little larger and flatter. It does not do all these things without our knowing it; we wish it done, and it is done. But we scarcely realize the number of eye muscles, six at least, which are called into play when focusing.

As for the sensitive plate behind the eye, that is even more wonderful; and, after all our study of it, it is not altogether understood yet. It is a plate with ten layers, of which the most important that we will mention are the rods and cones, the granular layers and the nerve-fiber layers.

The rods and cones are really the ends of the nerves that lead to the brain. They are sensitive to light, which is to say that when the beam of light coming through the lens falls on them it actually alters them. In the outer parts of the rods there is a stuff called visual purple, and when light falls on this it first becomes yellow and then colorless. The visual purple is, let us say, the chemical of the photographic plate of the eye.

But the really wonderful thing about this retina, and all the layers of which it is made up, is that it is not merely sensitive to light; it can tell what sort of light. It can distinguish color. It is for ever taking instantaneous moving color photographs. It has a wonderful command of color. It can see, not merely the chief colors, the big six—red, orange, yellow, green, blue and violet—but all the mixtures and gradations of these.

It has been noted of them that they can be arranged by the eye in octaves, and a great painter usually employs a range of four octaves, or 32 hues

Painful Pleasures

"There's no pleasure without its pain." "That's so. Even breakfast in bed has its crumbs."

Hardly

Hewitt—Money talks.
Jewett—It can't when it goes so fast it gets out of breath.

Mistaken Identity

"Laws, mose, why you s'pose them flies follows us so close?" "They ain't flies. Them's buckshot."

Sympathy

Joe—"I've got a bad head this morning." Bill—"I'm sorry, Joe. Hope you'll be able to shake it off."

Veteran Looks Back

The editor of the bright Clarksdale Journal is Ajax Fleming, and he reminisces as follows:

"Almost 59 years ago the writer, a freckle-faced, spindling kid, started on the downward road as printer's devil in the Palmyra Spectator office. Three years later he was a Journeyman printer in the old Hannibal Courier office, and in 1872 printer, reporter and editor. For more than 50 years he has been a writer on the Missouri press, and as to service is the oldest active editor in the state. He has had the double honor of having been called 'the boy editor,' and now the dean of the active fraternity. It has been a work of love and we've never

regretted that we 'learned the trade.' We have had our ups and downs, mostly down, but never out. Not one do we recall living who was in the writing game in 1870-72. If we ever get the Journal where we will not have to be editor, printer and devil—the entire works—we hope to hammer out a few chapters about the people and things of other days."—Atlanta Constitution.

Britons Eat More Raisins

People of Great Britain are eating more raisins and the reported shortage of Smyrna and Greek crops is expected to cause the British to consume the fruit from America.

The time is passed when the measure of the value of a memorial is quantity. I hope the time has come when that measure is quality. I care not whether the material be marble or granite, its future will be measured by the character of the design. It is quality that has preserved for us the finest examples in painting and sculpture. It is quality that will stamp our imprint upon cemeteries of the future. Simplicity, correct lines and proportions and proper ornamentation are the real fundamentals. A design that is right, material that is lasting, and perfect workmanship, spells success for the future of this industry and the beautification of the cemetery. Will you let me help you select the memorial for your lot. Call at show room. **NO AGENTS.**

Only Wings Necessary

A hundred and twenty years ago people were evidently inclined to make greater demands upon their "holy" than they are today. The following advertisement was clipped from Farmer's Museum, published in 1796: "Wanted, for a sober family, a man of light weight, who fears the Lord and can drive a pair of horses. He must occasionally wait at table, join in household prayer, look after horses and read a chapter in the Bible. He must, God willing, rise at seven in the morning, and obey his master and mistress in all lawful commands; if he can dress hair, sing psalms and play at cribbage, the more agreeable. N. B.—He must not be familiar with the maid servants, lest the flesh should rebel against the spirit and he should be induced to walk in the thorny paths of the wicked. Wages 15 guineas a year (about \$7 monthly)." "

Beware of Moths, better be safe than sorry. Have your winter garments thoroughly cleaned and pressed before packing away for the season. Get a Moth proof bag free at

CHARLES H. MAY

PYTHIAN CASTLE

IN MEMORIAM

Editor Union-Herald:— Benjamin Franklin Long, son of James M., and Mary A. Long, was born in Pickaway county, Ohio, June 8, 1860, and departed this life June 13, 1925, at the age of 65 years and five days.

He was united in marriage to Rosa B. Rector on January 16, 1886. To this union were born twelve children, four girls and eight boys. Three children, Ruth, Frank and Guy, have gone on before.

He leaves to mourn his departure his wife and nine children; Asa Long, London; Mrs. Beatrice Price, Plain City; Burdell Long, West Jefferson; Mrs. Ida Emrick, Richmond; Cecil Long, West Jefferson; James and Gilbert Long, of Columbus; Ethel and Ralph, at home; a sister, Margaret Boyssel and a brother, James R. Long.

He was a devoted husband and father, always considering everything with love and kindness for his family.

During his recent illness he often quoted the 23d Psalm. Thru all his trials he saw the bright side of life. On Sunday before his death his children gathered to celebrate his birthday anniversary. In the afternoon he requested a devotional service be held. He was so happy and said that he was in the Lord's will, ready to go at His call.

The funeral was held at the Church of Christ in Christian Union by Rev. Frank Sollars and Rev. Nelson, with interment in Pleasant cemetery, at Mt. Sterling.

TED LEWIS

In an ably written article in this month's issue of The Dance Review, a New York publication devoted to art of dancing, Ted Lewis (Theodore Friedman) has an article on Jazz music. The article is handsomely illustrated, with a full figure of the jazz king himself.

WASHINGTON

Bows To Circleville Sunday Afternoon In a 9 to 2 Defeat.

South Central Ohio League Standing.

	W.	L.	Pct.
Circleville	1	0	1000
London	1	0	1000
Washington	0	1	.000
Wilmington	0	1	.000

Sunday's Results

At Circleville — Circleville, 9;

Washington 2.

At Wilmington — London 7;

Wilmington 4.

The second half of the baseball season of the South Central Ohio League started off very auspiciously for the Circleville Eagle team yesterday when they took the measure of the Washington team, winners of the first half season, by a score of 9 to 2.

This was the first appearance of the Washington team here this season and unfortunately the breaks of the game made them appear to be a much weaker team than they really are. They really have a high class aggregation and it will take real ball playing to beat them out on the season.

A big crowd was out to see the contest and they certainly all got full return for their money as the contest was full of thrills and was a really spectacular affair up to the seventh innings when Circleville fell on Borst's delivery for four safe wallops, and the visitors crowding all of their fielding misues in this frame, the locals struck around and drove five runs over the rubber.

The first six frames was a pitching duel between Dewey and Borst, with Dewey holding the edge on Sammy but having a two all score because of a slip up on his support.

Washington got away to an early lead in the first when Dewey gave his only free passes of the game to Doyle and Miller in succession. After Jones had popped to Rife, Noon hit to Miller at first forcing Miller at second, Doyle taking third on the play, Dewey tried to catch Noon at first and in getting back to the bag he placed his spikes on O's toe and Doyle crossed the pan before O's could recover himself for the throw.

The other Washington run coming in the sixth, was also a gift. Jones led off with a single

and Doyle's perfect bunt put him on second and Rife having also gone after the bunt third base was left uncovered and Jones kept on going, reaching the sack safely. Miller then hit to Rife who threw to the plate to cut off Jones and Targee dropped the ball.

Circleville's first two runs were examples of inside base ball. In the fourth inning with two gone,

Targee hit safe, stole second and scored on Pettit's line drive to center. In the fourth Tommy Thompson walked and went to second when Donahue dumped Noon. Home run, Allen. Sacrifice hit, Donahue, Doyle, Knapp. Stolen bases, Rife, Targee, Doyle. Double plays, Bradley to Miller, Bradley to Doyle to Miller.

In Circleville's big seventh inning Donahue, Rife and Flood singled, Targee doubled and Dewey received a base on balls. In the eighth Donahue led off with another hit but was doubled with Dewey when Bradley threw to second from a sitting position after he had fallen over fielding the ball. With two down Rife hit safely and scored ahead of Allen when the latter put the ball out of the lot through the left field fence.

Sollars in left for Washington, pulled one of the most sensational plays ever seen in Circleville. In the sixth with two out and men on second and third, Thompson hit down the left foul line. Sollars took the ball at full speed with a back-handed catch in his glove hand. The ball was ticketed for a sure three bases as Tommy was at second when the catch was made. Tommy himself also pulled a circus stunt when he fell over backwards in fielding a ball from Doyle's bat and recovered in time to catch the runner at first with a perfect peg.

On next Sunday Wilmington will play in Circleville while Washington is entertaining London. Circleville will have five at home games during the second session of the season.

Zambesi Falls Called Inferior to Niagara

The Victoria falls are located on the Zambesi river, in Rhodesia. They are more than twice the height and somewhat wider than Niagara falls. The native name is Musi-on-tun-ya—"Thundering Smoke" or "Smoke Does Sound-Here."

The Zambesi, one of the four great rivers of Africa, is more than 1,700 miles in length and carries an enormous volume of water, so that the falls are a magnificent spectacle at any time of the year. But this volume of water is not as great as that which pours out of our lakes, and it is in this respect that the Victoria falls are inferior to Niagara.

The African cataract is divided by islands so that it forms four falls, two wide and two narrow. Near the right bank of the Zambesi is the Leaping Water, a fall 108 feet wide; then Boaruka island; then the main fall, 1,419 feet wide; then Livingstone island; then the Rainbow fall, 1,605 feet wide; then another island; and finally the Eastern cataract, which resembles the Leaping Water.

The Victoria falls occur where the Zambesi is at its widest. They fall over an edge which is almost vertical, but instead of falling into an open basin as Niagara does, they drop into a chasm the opposite wall of which is only 80 by 240 feet away. The outlet of all this water is a gorge 300 feet wide, which leads a little farther on into a Grand canyon 40 miles long.

The falls were discovered by David Livingstone on November 17, 1855. They are on the route of the Cape-to-Cairo railway, and a bridge 650 feet long has been constructed across the canyon some distance below the falls.

Fog Injurious to Birds

Fog affects the birds and beasts at the London zoo to such an extent it has been decided to install electric lights to temper the dampness and darkness caused by the moistened haze and coal smoke that creeps into all the cages when fogs are at their height.

HOME FROM CALIFORNIA.
James Reichelderfer has returned home from a five weeks' visit in California. He was the guest of his daughter, Mrs. Fred J. Jackson, at Montara, a suburb of San Francisco. He also visited Santa Barbara, the city recently stricken by an earthquake. He met a resident of Lorain, Ohio, who said the damage wrought by the quake was not nearly as great as that done by the cyclone that struck Lorain.

Really Helpless, You Know
The prize excuse was introduced in an English court during the trial of a man charged with wife-beating.
A neighbor who was present during the assault was called as a witness for the prosecution. He described the blows in detail and the wife's helplessness.
In astonishment the judge turned to the witness and asked: "Do you mean the court to understand that you stood by and saw this man strike the poor woman again and again?"
"Yes, I saw it all."
"And you made no effort to interfere?"
"I couldn't."
"Why not?"
"I was filling my pipe."

FOOT RULES
By Master Quickstep
RULE—Be foot cautious in the summertime.
EVERY pore in our bodies takes a breath as naturally as do our lungs so give your feet a chance to breathe. Our shoes are scientifically constructed and will help to keep your feet in a healthy condition.
"We fit your feet."
L.F. Smithhisler
BOOTERY
104 E MAIN ST.

TRY A GUN
"Madame," said the dignified gentleman, "your dog bit me on the ankle."
"He did?" cried the lady. "Oh, I must send for the doctor!"
"Oh, I assure you it isn't as bad as—" "You're the third person he's bitten today," broke in the lady. "I just know he isn't feeling quite well."—Legion Weekly.

Wisdom of the People
"A little nonsense now and then is relished by the best of men."
"Undoubtedly," answered Senator Sorghum. "The only trouble is that when you put a little nonsense into your talk it's liable to prove the only part that some of your auditors take seriously."—Washington Star.

BRUTAL TRUTH

Miss Ann Teak—Don't you think I look more youthful with my hair bobbed?
Mr. Hardfax—You sure do. One more clip and you'll be in your second childhood.

Both Toilers
The farmer and the sailor toil alike to some degree.
For where the former tills the soil The latter plows the sea.

Bird Life
"Never lived in the suburbs before?"
"Never."
"You'll enjoy the bird life on the place. This is a house for the bluebirds. And yesterday I saw a cuckoo on the lot."
"Good. I'll hang out an old clock."

A Difficult Case
Sleeping Beauty—If you think me pretty my hundred-year beauty sleep will not have been in vain.
Prince Charming—Say, if it took a century to make your face what it is now you'd better turn over and take another nap.

Viewed Tolerantly
"I like the springtime."
"Why?"
"Well, you see, I don't care for work at any time, but it is only in the spring that that attitude gets any sympathy."

INSIDE DOPE

"Say, why's the doc pumping out that fellow he thinks poisoned himself?"
"Trying to get the inside dope on his case."

Dismissing the Past
Republics are ungrateful, sure. For which we're all regretful. But many a statesman's more secure Because they are forgetful.

Premonition
"Did you expect me to accept you the night you proposed?"
"I did. Just before I reached your home I walked under a ladder and a dog howled three times."—Sydney Bulletin.

Her Job
"It's the little things that count," said the educational lecturer.
"Yes," responded the primary grade teacher, "but you can't imagine what a hard time we have teaching them to do it."

Quick Changes
Mrs. O'Gay—John, with my make-up on I could pass myself off as your daughter.
Mr. O'Gay—Yes, and with it off, my dear, I could pass myself off as your son.—New Bedford Standard.

The Lace Maker
Irate Customer—Here, look what you did!
Laundryman—I can't see anything wrong with that lace.
"Lace? That was a sheet!"

Shakespeare Revised
She—Hast thou heard that Shylock is once more wealthy?
He—Yes, he has been selling a correspondence course on "How to Lose Flesh."—California Pelican.

The Very Ideal
Old Lady—Surely a man like you could get a job in some business?
Street Singer—What, and sacrifice my career?

TRUE STORY
Of Fairfield's Belled Buzzard Told—Bell Placed On Neck
By J. T. Bowman 54 Years Ago.

At various times in the past year the belled buzzard has been reported at different points in Fairfield county, and in fact, the bird has recently taken up his abode near Sugar Grove. The big fellow is seen by the residents of that community almost daily.

It was popularly supposed that this was the buzzard liberated in 1864 in Georgia and the real history of the strange creature of the air was not known until today, when J. T. Bowman of Athens, a former Fairfield county man, told the following story to an Eagle reporter in Lancaster.

"In April, 1871, when I was but 11 years of age, I lived with my parents two miles south of Clearport on what is known as the Sam Spigler farm. Following a week of heavy rains, a straw shed collapsed one night killing a bull. We dragged the carcass with a team of horses down into the creek bottoms and the following day many buzzards and crows came to feed.

"It so happened that Will Simmons a playmate of mine had a pet crow and desiring to secure one myself, I set a trap near the body of the bull with the result that I soon caught a young turkey buzzard. I took it to the house and showed it to the family. My mother told me not to harm it. I then took a small brass sheep bell and using the same strap that had been attached to the sheep's neck I placed it around the bird's neck and liberated it.

"I remained on the farm until 21 years of age and then came to Lancaster where I lived continuously until eight years ago when I moved to Athens. During all of this time the bird would be reported as having been seen at various points in Fairfield and adjoining counties. From the years 1893 to 1896 the buzzard disappeared from this locality but was reported frequently from places in Indiana and Michigan. This was the longest period that the belled bird was reported away from here."

There can be no doubt of the veracity of this story, as Mr. Bowman is widely known here. His brother Albert, is now living near Clearport; two other brothers, George and Jack, live at Stoutsville and Circleville, respectively. All will verify his narrative.

Mr. Bowman is at present employed as stationary engineer with the Southern Ohio Electric Co., at Athens. For many years he served in a like capacity with the various Lancaster "plants."—Lancaster Eagle.

Modern France Surely Paradise of Children

The single child in France is the normal standard. He is petted by the whole clan of uncles, aunts, and cousins. At six years of age his own little world seems to revolve about him, eager to satisfy his smallest wish, to keep him amused, to provide him with pleasure. In the Luxembourg gardens I have been watching the children of France, and listening to their laughter before the guignol show—old Punch and Judy—in the Champs Elysees, and galloping pigs up in the great circus of the Boulevard de Clichy. Sir Philip Gibbs says in World's Work.
France is the paradise of children. Crowds gather round to watch them at play. The very eyes of the agents de police soften at the sight of them. I have just come from a christening of two babies in a little church in a low quarter of Paris. The whole congregation watched the ceremony with emotional interest. Two little lives added to France—that was good! Admirable! The father and mother were regarded with admiration and esteem. But what a risk, with the cost of living so high in Paris!

Going without breakfast may benefit the health, but it is likely to make one look baggard.

If one is so rich he can go on a trip whenever he likes it, he misses a lot of the fun of it.

MANY METHODS OF SIGNALING
Early Inventions for "Long-Distance" Talk.

The fabulous honor of being the first inventor of the art of signaling, says the Scientific American, is bestowed by certain classical writers upon the ingenious Palamedes, but it is certain that long before the time of the Trojan war the Egyptians and Assyrians, if not the Chinese and other nations of remote antiquity—of whom monumental records alone remain to us—had developed regular methods of signaling by fire, smoke, flags, and so on. Signals were passed from tower to tower of the Great Wall of China, and the Tower of Babel was a signal tower.

Beacons were "as old as the hills" on whose summits they were placed. Those lighted on Mounts Ida, Athos, Clitheron and intervening heights conveyed information of the taking of Troy by Agamemnon. Leander was guided across the Hellespont by the signal lamp displayed by Hero in her tower at Sestos. One night the lamp was blown out—he was drowned, and she then threw herself into the waves. Theseus, in the Argonautic expedition, conveyed information by colors of the sails hoisted, but killed his father through a telegraphic error; for, flushed with victory, he forgot his signal, and old Aegeus, seeing the black sail, and feeling sure his son was dead, flung himself into the sea.

The use of mirrors to flash signals by the sun's rays dates back to the time of the pharaohs. The Persians are said to have considerably developed it for purposes of war.

The Persians, the Gauls and the Aztecs communicated by relays of sentinels shouting to one another, and Alexander, by means of the stentoraphonic tube, tactician Arnios communicated at night by means of a tall vessel containing water, which was let out slowly by a tap at the bottom; on the water floated a cork disk carrying a gauge with divisions down the side, and on each division a separate sentence was inscribed. Each signaling point had one of these contrivances; and on a light being shown from one station it was acknowledged by the other, and each clemysdra opened at the moment. When the surface of the water receded to the sentence required, the signaling station again showed a light, when the other stopped the outflow and read the words inscribed at the water level upon the corresponding gauge.

Hannibal erected watch towers in Africa and Spain to signal from; and whenever the Romans extended their conquests in Gaul, Spain or elsewhere, they made use of similar signaling devices. A representation of one of their telegraph towers is engraved on Trojan's column, and ruins of some of them are still to be seen in parts of France.

Don't Talk—Telegraph

A traveling man went into a railway restaurant and gazed discontentedly at the profusion of pies and cakes on the counter. "Haven't you got anything solid to eat?" he asked.
"Shall I give you some beans?" asked the proprietor, with his most persuasive smile. The traveler assented and, making short work of them, asked: "How much?"
"Twenty-five cents," was the bland response.
"What!" cried the drummer; "25 cents for a spoonful of cold beans?" The proprietor continued firm in his price, the man paid it and departed. But late that afternoon a telegram was handed in to the restaurant keeper, for which he paid 25 cents.
It ran thus: "Don't you think your price a little high on beans?"—American Mutual Magazine.

Alexandra

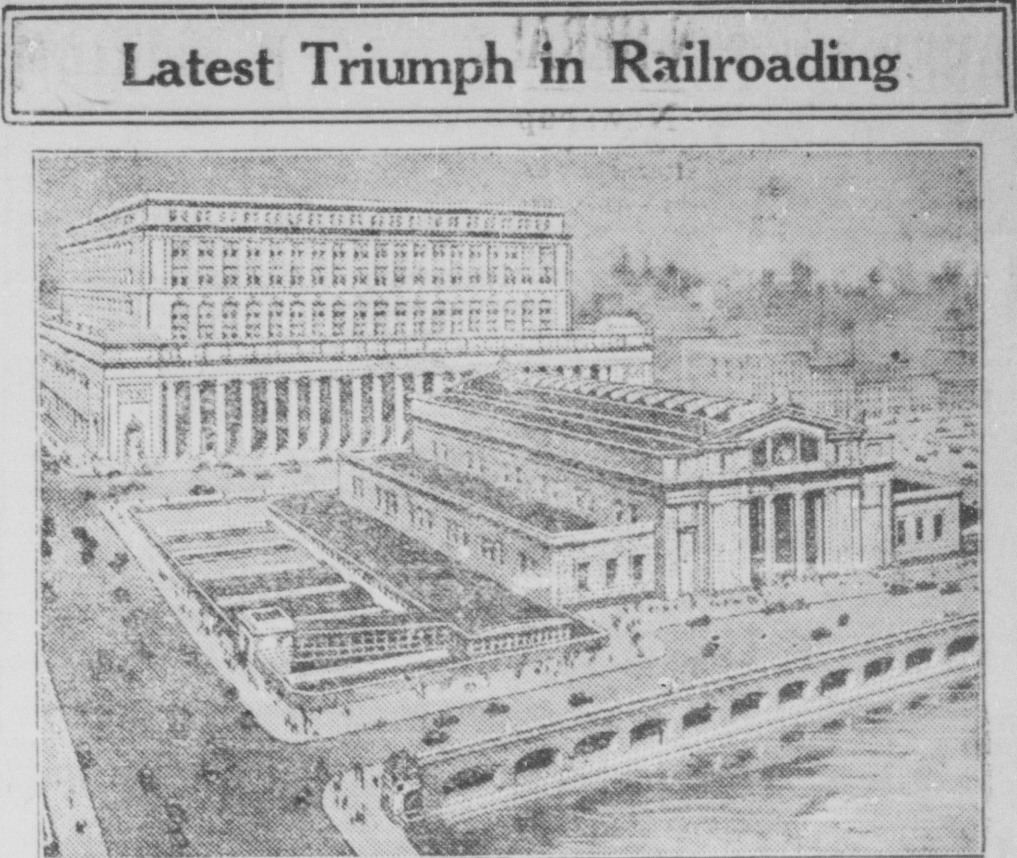

Alexandra, queen of Judea, the widow and successor of Alexander Jannaeus, was a wise and virtuous princess, who, contrary to example of her husband, studied to please her subjects and preserved peace and prosperity during her reign of seven years.
She died in the seventy-third year of her age, B. C. 70. She was the mother of Hyrcanus and Aristobulus and the latter years of her reign were disturbed by the attempt of her younger son, Aristobulus, to obtain the sovereignty, as he was exasperated by the favor his mother showed to the sect of the Pharisees and the authority she allowed them.—Chicago Journal.

Double-Decked Airship

Two separate decks and accommodations for 100 passengers are features promised in a giant airship of stainless-steel framework that is planned for traffic between England and India. Its motors are to use a heavy gas oil, eliminating the fire hazard to such an extent that passengers will be permitted to smoke during the voyage. A smoking room is included in the plans. The ship will be 720 feet long, 140 feet in diameter and will contain two-bed sleeping cabins.

Nothing to Cackle Over

Small Elizabeth was visiting on her grandfather's farm. As she walked hand in hand with her grandfather toward the barn, she heard a hen clucking loudly. "What's that?" she inquired.
"A hen," replied her grandfather. "She's laid an egg and she's proud of it."
Elizabeth looked up in astonishment. "Proud of it?" she exclaimed. "Why eggs as cheap as they are now!"

Latest Triumph in Railroading
THE completion of the new Chicago Union Station marks a noteworthy accomplishment in the history of important engineering undertakings, from which travelers from all parts of the United States will derive pleasure and benefit.

The station is without doubt one of the finest and most efficiently designed railroad terminals in the world. It forms a vital link in the realization of the "Chicago City Beautiful Plan." Simplicity, accessibility and convenience for the traveling public are the essential virtues of the new terminal. Rest and recreation rooms, ticket offices, barber shop, dining rooms, stores of various kinds, and almost every convenience known to travelers, are to be found on the one level, no steps to climb.

The main station is a low monumental type of building with a row of massive columns of classic design along the entire east front. Once inside, the traveler finds himself in a gigantic waiting room more than 100 feet high and brilliantly lighted through skylights in the great arch ceiling. Colonnades inclose the room, the walls of which are patterned after the architecture of ancient Rome. Bordering this room are the ultra-complete passenger terminal facilities. An innovation in railway terminal design is a conference room accommodating 125 people, which is available, without

charge, to patrons of the Union Station lines for conferences and other meetings.
To give some idea of the immensity of the new station, it may be stated that the main building covers an area of about three acres with a concourse covering 60,000 square feet. The entire terminal facilities cover more than 35 acres and will expedite the prompt and satisfactory handling of 50,000 passengers, 400 tons of baggage and 300 trains daily with room for future expansion. Fifteen acres of glass were used in the various coverings over the train sheds, which extend more than 1,200 feet beyond the main structure. A total of 17,000 tons of structural steel, 175,000 cubic feet of Indiana limestone and 10,000 cubic feet of granite were used in the station building and concourse. The foundation consists of 449 cylindrical concrete piers from four to ten feet in diameter, reaching to a depth of more than 60 feet below the level of the Chicago river.
Those who have had the privilege of inspecting the new station pronounce it a marvel in terminal construction and are urging their friends to see it on their next visit to Chicago.
The station is used jointly by the Pennsylvania Railroad; Chicago, Milwaukee & St. Paul Ry.; Chicago, Burlington & Quincy R. R., and the Chicago & Alton R. R.

Surely Paid Jim
Harry Tate is a well-known English humorist who has a peculiar brand of fun all his own. The irrepressible Harry tells the story how, at a meeting of a smallholders' club, a somewhat dejected-looking member was asked: "Do you think poultry-keeping pays?"
"Well, no, I can't say that I do; but I think it pays my son, Jim."
"How's that?"
"Well, you see, I bought him the fowls; I have to pay for their keep, I buy the eggs from him, and he eats them."

A System of Farming That Brings Health and Prosperity

Every farm, regardless of the method of farming practiced or of the crops raised, should have at least a few good milch cows to provide
(1) Enough milk, cream and butter for home use;
(2) Enough skim-milk to raise some calves, pigs and chickens;
(3) Enough cream or butter to sell to pay, in part or entirely, current living expenses.
This plan has been a "life-saver" for thousands of farmers, especially during the hard times of the past two years. It insures a living, at least, and often other income besides.
Such a plan pays best with a De Laval Cream Separator. It soon pays for itself—and skims cleaner, lasts longer and is easier to operate and clean than any other.

**Flavors and Odors
of Milk From Feed****Precautions Must Be Taken
in Feeding Vegetables.**(Prepared by the United States Department
of Agriculture.)

When cows are fed such succulent feed as cabbage, potatoes, green alfalfa, green corn, turnips and silage, there is liable to be some noticeable flavor in the milk unless precautions are taken, says the United States Department of Agriculture. A great deal of experimental work has been done in the use of these feeds, and certain practices have been found desirable and practicable. The important facts brought out were as follows:

Feeding succulent feed before milking is likely to impart an undesirable flavor and odor to the milk.

The longer the time elapsing between feeding and milking the less pronounced will be the undesirable flavors and odors.

Feeding succulent feeds immediately after milking has little or no detrimental effect.

Prompt and thorough aeration of milk while still warm will remove slight flavors and odors and will lessen the intensity of strong flavors and odors.

The department's market milk specialists say that feeds may be one of the most frequent causes of abnormal flavors and odors in milk, and for that reason the feeding of the succulent feeds listed above should be done very carefully.

Sometimes the appearance of feed flavor or odor in milk alarms the consumer, and it may be to the interest of the producer or distributor to acquaint the public with the cause.

**Economical Ration for
Feeding Ewes and Lambs**

Experiments at the Ohio agricultural experiment station have shown that when the ewes are in good thrifty condition heavy grain feeding prior to lambing is uneconomical and does not increase the efficiency of the ration. A light grain allowance, however, is to be strongly recommended even though legume hay and corn silage make up a large part of the daily feed, for the ewes feed one-third to one-half pound of grain per head daily in addition to legume hay and corn silage weaned strong lambs and had an abundant supply of milk.

After lambing, the grain allowance should be increased sufficient to maintain the condition of the ewes as far as possible and to insure a good flow of milk. When the lambs have learned to eat grain, and they should always have a creep where they can eat without interference, the grain allowance of the ewes can be somewhat reduced without reducing the efficiency of the ration.

**Proper Plan to Supply
Bee Colony Foundation**

The cost of foundation is very small compared to the cost of letting the bees build it. If the bees build comb they have to eat a good deal of honey and stay in the hive to generate the comb. They seldom build comb except when there is a good honey flow on. By using foundation the beekeeper saves the comb builders much work, and thus provides many more field workers. Two advantages for comb foundation are as follows:

1. Combs built on foundation are straight and easy to handle.
2. Comb foundation is stamped for working bee cells, and the bees draw it out as it is started, and in this way avoid raising excessive numbers of drones.—E. S. Prevost, Extension Bee Specialist, Clemson College.

**Sheep Shearing Machine
Is Quite Satisfactory**

There are many methods of shearing sheep, ranging all the way from a pair of ordinary scissors to the finest machine clippers. Quite a few farmers at the present time are using hand shears. Probably the most satisfactory machine on the market now is the flexible shaft machine, which has an attachment for clipping horses and mules and another attachment, or flexible arm, for sheep shearing. This machine will cost somewhere in the neighborhood of \$30. Where several farmers in a community are growing sheep Prof. L. V. Starkey, chief of the animal husbandry division at Clemson college, suggests that they can co-operate by purchasing a machine and use the same machine for all of the small flocks.

FARM NOTES

Ten pounds of alfalfa seed per acre is about right.

The good farmer keeps himself and his farm well posted.

A handsome, durable, convenient farm gate is a three-fold blessing. Count 'em.

The crop we used to regard as a weed, farmers now regard as one of their most valuable crops.

The best way to appreciate fully the value of proper farm equipment is to do without it and figure the loss.

Sweet clover pastures carried from six to ten times as much stock as would native grass and with greater returns in milk and meat.

MACK PARRETT

Here's New Theory
Prof. Nicholas Morosoff, an eminent Russian scientist and philosopher, has just published a somewhat sensational work in seven volumes, entitled, "Christ." In it he affirms that St. Basil the Great was the real Christ. He says it is not true that St. Basil, or Christ, was crucified, but he was punished only by being tied to a tree, the date of this event being March 21 in the year 888 of the present era, and that he lived eleven years after this date. The existence of the twelve apostles, he says, is a mere myth, which arose over the fact that St. Basil, or Christ, was surrounded by a

group of learned astrologists. Professor Morosoff says he bases his convictions upon intensive study of astronomy, astrology, philosophy and history while imprisoned twenty years by the czar. He was gulled by "astronomical and rationalistic methods."

New Panama Laws

Such a Cloistered Life
By MYRA CURTIS LANE
(© 1924, Western Newspaper Union.)

MRS. FRANK MURRAY was peeping out behind her curtains at the woman in the next garden. Mrs. Lillian Gates she called herself, and a widow, but every one knew who she was. They had known as soon as she took the house, a month before. The owner had said that if he had known she was the woman who figured in that notorious case of the millionaire he would never have rented it to her.

Plenty of money she seemed to have, but of course nobody would have anything to do with Mrs. Gates in a social way. Certainly Mrs. Frank Murray wouldn't. She was a pattern housewife, and a stickler for the conventions.

Nevertheless, she had watched Mrs. Gates furtively ever since she had taken the house next door. Mrs. Gates was always in her garden, planting flowers and shrubs. It was strange that a woman like that should care for flowers. Mrs. Murray associated her with the white lights and champagne.

And though she would never have admitted it to herself, Mrs. Murray looked on Mrs. Gates with a sort of envy. She herself had lived such a cloistered life. There were so many hidden phases of life that she had no desire to investigate—wicked things, like the existence of this Gates woman. Nevertheless, she was curious. Mrs. Gates aroused her curiosity. And envious—not to be like her, but envious of her experience.

Cloistered—that was what Mrs. Murray was, like thousands of her kind. Frank coming home every evening, and his dinner to be cooked—then little Tom to be looked after, and kept out of mischief, and bathed and dressed and played with.

The boy was the Murrrays' idol. When the epidemic struck the town they were overwhelmed with anxiety about him. It was a malignant form of scarlet fever. Mrs. Frank Murray hardly ever peeped out at the woman next door.

The day came when, Frank being at the office, Tom came in with a flushed face and a sore throat. He complained of headache. His mother was in terror. She knew what that portended. She must have the doctor instantly. There was no telephone in the house. She ran out of the house in a distracted way.

"What's the matter? Can I help you?"

"Oh, my child's ill. The doctor—"

"Have you no telephone? Come in. Use mine. No, let me call him!"

In spite of her fears Mrs. Murray found time to look about her in wonder at the tasteful interior of Mrs. Gates' house. She admired her white morning frock, her cool, well-bred tones over the telephone.

"He'll be right around," said Mrs. Gates.

The other woman thanked her impulsively and fled. She waited in agony for the verdict.

"Scarlet fever? Nothing of the kind," said Dr. Aston brusquely. "So long as you keep him from contact with other children there's no way he can get it. A feverish cold, and some derangement of digestion. Nothing to worry about. Keep him quiet and he'll be running about again tomorrow."

Mrs. Murray felt indescribably thankful. She smothered the little boy with kisses. Then she went on with her cooking. Everything was normal again. But presently something began to creep into her mind. She knew what it was. She had placed herself under an obligation to that woman next door. She must go in and thank her.

Reluctantly she changed her dress and went to the door. Mrs. Gates opened it.

"How is the boy?"

"It isn't scarlet fever," replied Mrs. Murray happily. "I—I just came in to thank you for your kindness—"

"Oh, that's all right. I saw you looked distressed and knew something must have happened. I am so glad."

Then Mrs. Murray said a strange thing in her gratitude, for which she could never afterward account.

"Now we're neighbors, you must come in and see us sometimes," she said.

A flush of gratefulness came upon the other woman's face. "Oh, I'd like to so much, sometimes. If you will have me," she answered. "Living so much alone—one gets to feel so cloistered."

Health and Home
ICED DRINKS IN THE SUMMER

On a warm and sultry summer day, there is nothing more refreshing to the mind and to the body than an iced drink. Of course, when such drinks are being used, moderation should be practiced, because if taken in excess or too rapidly, they are liable to be injurious to the stomach. However, when taken in a sensible manner, they are refreshing and beneficial to the fatigued. In the manufacture of these drinks, care should be taken to avoid any combination that may be indigestible or hard to assimilate. The drink should be consumed in a slow and leisurely manner.

The greatest danger present in the use of iced drinks is the one that involves the use of ingredients that are possibly impure or contaminated in any way. This is very liable to happen if the juices that are used are allowed to stand until they become soured and unfit for use, or if the milk or other ingredient used is not strictly fresh. The predisposition of milk to spoil quickly at summer temperatures makes it oftentimes necessary to use evaporated milk, which after all is just pure fresh milk with more than half the water taken away. It is sterile and, therefore, always safe. For use in iced drinks, it is ideal.

Following are several formulas used in the manufacture of iced beverages. If these formulas are followed religiously, the results will be found to be very satisfactory.

Chocolate Malted Milk.
1 cup evaporated milk 3 teaspoonfuls cocoa
1 cup water 2 teaspoonfuls malted milk
Mix cocoa with water until syrup is obtained. Put all ingredients in Mason jar and shake thoroughly and serve with chopped ice.

Milk Punch.
1 cup evaporated milk 2 tbsps. orange juice
Sugar to suit taste ½ cup water
1 cup tea 1 small stick cinnamon
2 tbsps. lemon juice ½ cup fruit juice (currant or berry preferred)
Boil slowly the cinnamon, a lemon rind and orange rind in water for ten minutes. Strain and when cool add the other ingredients. Place in a Mason fruit jar and shake well. Serve in tall glasses with chopped ice.

Egg Nog.
1 egg 1½ tbsps. powdered sugar
Pinch salt 2 tbsps. fruit juice
½ cup cold evaporated milk Nutmeg gratings
Add salt to egg white and beat to a stiff froth. Add the sugar, the beaten yolk of the egg and the fruit juice and nutmeg. Fill glass with milk and cold water. Sprinkle top with chopped nuts.

KEEPING WELL
BOTTLING SUNLIGHT
DR. FREDERICK R. GREEN
Editor of "HEALTH"

WHETHER Moses or some other man wrote the book of Genesis is for Biblical experts and critics to decide. Whoever wrote it says that before any life appeared on the new world God said, "Let there be light." Whether God made the universe in six days, as the orthodox say or in six hundred million years, as geologists say, doesn't matter. That's a question of detail. What does matter is that the more man knows the more he realizes that before there is any life there must be light.

And in our universe the only light there is, is sunlight. Wood, candles, coal, oil, electricity, all depend on sunlight.

What sunlight is we do not know. It is not the simple thing it was thought to be for centuries. We know there are some rays in sunlight that are invisible to the human eye but which can be detected by special instruments. There are probably many more of whose existence we have not even guessed.

Neither do we know much about the effect of sunlight. But we do know something about the effect of the lack of sunlight.

Rickets is a common disease among children. Fifty per cent of all breast-fed babies and nearly 100 per cent of bottle-fed babies will develop it unless proper treatment is used. It is caused by lack of lime and phosphorus in the growing body. Cod liver oil has long been used in its treatment. Then it was found that cod liver oil, after being exposed to the sun, gave off ultra-violet rays which affect a photographic plate. So the oil must have absorbed these invisible rays and given them off to the body.

Then the investigators went a step further. They exposed other oils, such as cotton seed oil, to sunlight, and found that it, too, gave off ultra-violet rays after exposure and caused a rapid and complete cure when given to animals suffering from rickets.

Apparently the oil absorbs the sunlight and then gives off its healing rays after it is taken into the child's body.

And now Dr. Henry Steenbock, professor of agricultural chemistry at the University of Wisconsin, finds that placing food in the sunlight will give it growth-promoting qualities which it formerly did not possess. So the vitamins we have heard so much about may be simply the imprisoned sunshine which is found in leafy vegetables.

Few Now Have Faith in Legend of St. Swithin
July 15 is observed in England as St. Swithin's day. It is so called because of the legend connected with St. Swithin, bishop of Westminster, and tutor to King Alfred. At his request he was buried in the churchyard of the abbey, where "passers-by might tread on his grave, and where the rain from the eaves might fall on it." After his canonization in 865 A. D., it was resolved to remove his remains to the chancel, the customary burial place of the bishops, and July 15 was appointed for the ceremony; but on that day and for forty days thereafter, St. Swithin, to testify to his displeasure, caused rain to fall so heavily that the monks abandoned their design as heretical and blasphemous. From this legend arose the popular superstition in England that if rain falls on July 15 it will continue to do so for the forty days succeeding. Careful records kept at Greenwich observatory for many years, however, show the superstition has no foundation in fact.—Kansas City Star.

Keeps Kitchens Cool

WHY fire up the old coal range and swelter while preparing the meals these terribly hot days? Why heat up the entire range just to heat a little water, or make a cup of coffee? Keep your kitchen cool and comfortable with an oil stove.

ALCAZAR

oil cook stoves are fully guaranteed by the factory to give perfect satisfaction. YOU TAKE NO CHANCES. No need to fire up the coal range and hold the fire all day. In less than five minutes you can have a "red-hot" fire for cooking and ironing. And when you have finished your work, turn your fire out.

We will gladly demonstrate our line of oil cooks, and will furnish you with the names of our users for reference.

IT PAYS TO ADVERTISE

MANY KINDS OF VITAMINES

There are all sorts of vitamins. Scientists know very little about them, save that food would not be nourishing without them. Lack of one kind causes scurvy. Lack of another kind causes rickets. When rice husking machines first came into use the native rice eaters began dying with beri-beri, for the husks contained a vitamin necessary to health. Milk is rich in vitamins, but where did the cow find them? Prof. Drummond, of the University College, London, has discovered vitamin factories—in microscopic sea plants called diatoms. No animal can create any kind of vitamin, but copepods and cods eat welks—so cod liver oil is as full of vitamins as honey of pollen. But the professor leaves us in the dark as to how the vitamins find their way from cods to cows.—Los Angeles Times.

AMERICA LEADS IN EDUCATING BLIND

German Woman Says Cleveland Methods Are Best.

Berlin.—America is leading the way in educational methods for the blind in the opinion of Miss Betty Hirsch, director of the School for the Blind founded during the World war by Germany's famous oculist, Gehehrn Stix.

"The city of Cleveland," she observes, "has found the ideal solution of the problem, in that education for the blind children is not carried on in special schools for the blind, the blind pupils are interspersed among the sighted children. This procedure is of the greatest benefit, not only to the blind children, but to the others as well, in that it accustoms them to getting along with their less fortunate fellow pupils and shows them that a blind student can do fully as well as a sighted one."

"The feeling of human pride is quite as pronounced with blind people as it is with those enjoying eyesight. Self-confidence can be encouraged among the blind only if they feel that they are being offered an opportunity to show that they can hold their own in competition with others. If the blind are separated from the sighted, this confidence can never be instilled in them. America is absolutely right in mixing the blind in with the sighted."

MASSACRE SURVIVOR

Jay O. Spencer of Joliet, Ill., a farmer, who is said to be the only living survivor of the massacre of soldiers under General Custer in the battle of the Little Big Horn. Spencer escaped the redskins by crawling into a hollow log.

French Plan Heavy Tax on Alien Land Holdings

Paris.—Foreigners purchasing real estate in France would be subject to a real estate sales tax four times as large as that levied upon natives if a bill now in the hands of the finance committee of the chamber is approved by the French parliament.

The present law imposes a tax of 13 per cent of the price paid, while the new bill would amend the law by making it 52 per cent when the buyer is a foreigner, "even when such a foreigner has a legal domicile in France."

"The depreciation of our currency has incited a certain number of capitalists belonging to countries favored on the international exchange market to invest their capital in France, in the hope of realizing heavy profits when the franc returns toward its par value," the preamble says.

"The franc having lost 80 per cent of its value, the English and the Americans are thus able to buy French property at prices much below those prevailing in 1914."

Health Report Warns of Anger While Eating

New York.—A happy outlook and a carefully balanced diet are two essentials set forth by the public health service as essential to good health. A warning against excitement or anger, especially at meal time, is sounded as detrimental to digestion. It is known, says the service, that certain kinds of emotions, especially the happy kind, help the proper functioning of the organs while others have an unfavorable influence.

"The energy or power we use for our activities comes from the food we eat," says a recent radio health talk bulletin. "Living as we do, on diets containing meat, milk, eggs, cereals, vegetables, fruits and greens, we get sufficient protein for tissue-building material, sufficient starches and sugar for energy, sufficient fats, mineral matters, vitamins and water to enable the body to work well and to keep its power to offset injurious agencies."

WILL INSTITUTE DRIVE AGAINST BEER

SOLID PROHIBITION PHALANX WILL MAKE GREAT CHARGE

Speedier Court Action and Heavier Penalties Against Brewer Violators Is Promised—Treasury and Justice Departments Now Working As a Unite—Freer Use of Search Warrants.

The federal government is preparing to launch a new campaign to stop the leakage of "high power" beer.

New regulations are being drawn looking to more drastic action against the brewer of the illicit commodity. They are intended to be so definite and positive as to assure speedy action by the U. S. attorneys in court procedure against violators of the beer section of the national dry law.

The program contemplates demanding that the owner of every "potential brewery" obtaining a federal permit before operating his plant, will be construed as within the law. A system of intelligence by which the breweries may be kept under constant surveillance has been worked out, and the removal from such a plant of "high power" beer, or any beer containing more than one-half of one per cent of alcohol by volume will be cause for action by the prohibition agents.

The second important phase of the regulations is designed to compel speed in the offices of U. S. attorneys. Provision is made that the prohibition agents who develop the evidence may keep tab on the progress of each case in court and advise both the treasury and the department of any delay, with full details. With some types of court action, the report will be sent in after 10 days; with others the delay may be 15 days.

Decision to reorganize operations against the makers of contraband beer was reached after several conferences between Assistant Secretary Andrews, the treasury's prohibition field marshal, and Mrs. Mabel Walker Willebrandt, assistant attorney general in charge of prohibition prosecutions. Their conclusions were described as having solved numerous legal problems involved, as well as practical enforcement obstacles.

Coupled with the information that the new regulations were approaching completion was the indication that harmony had been attained between the prohibition sections of the treasury and the department of justice.

In considering the procedure to be followed against brewers who violate the law, Andrews and Mrs. Willebrandt consulted freely with half a dozen prohibition officials assigned to duty in Pennsylvania, New York and New Jersey, whence complaints have been most numerous. One official said that if the plan produced satisfactory enforcement in those states, it would serve "most excellently" elsewhere.

Procedure under the new regulations is expected to bring about freer use of the search warrant by agents to enable them to seize liquors and other property so that stronger evidence may be gathered and pleas for injunctions will be expedited in the courts.

In dealing with offenders against whom injunctions have been obtained previously, the plan calls for the filing of a citation for contempt of court, within ten days.

In discussing the policies to be effected in the beer campaign, all of the officials agreed that there had been too much delay in getting cases to trial.

While there was no official comment on it, the understanding was given that the system of reports under the new regulations would enable the responsible executives here "to put a finger on the machinery that is not functioning."

LARGE SEINE CONFISCATED ROSS COUNTY

Confiscation of the largest drag seine ever seized in Ross county was announced by Game Warden Francis Monday, who reported that he found the net, 120 feet long, in the basement of the home of Albert Aid, local butcher in the Story addition.

Aid, appearing before Squire Hess this morning, plead guilty and was fined \$200 and costs. The seine, Francis said, was another "partnership" affair and prominent local men are said to have been involved.

A report on the seine was made direct to Columbus authorities and Francis acted on their request. He was accompanied on his search by Game Warden Temple.

Charles Roll, of Austin, arrested in connection with drawing of a seine one night last week, was arraigned before Squire Hess this morning and his hearing set for Wednesday morning at 9 o'clock.—Scioto Gazette.

WILLIAM MILLER DEAD.

William Miller aged 60, died at the County Home Monday afternoon at 6 o'clock. The deceased was a former employe at Dan Gephart's restaurant on South Court street.

The remains were removed this afternoon by Mader and Ebert to the home of Charles Leist on South Scioto street.

The funeral services will be held at the Reform church, Stoutsville Wednesday morning at 9:30 o'clock. Rev. Mr. Beaver will officiate. Interment in the cemetery at Stoutsville.

SCHOLAR THOUGH BLIND

Miss Mary Josephine Curcio of Newark, N. J., a blind student, who graduated with high honors from the New Jersey college for women, a department of Rutgers university. Miss Curcio received the degree of bachelor of arts, and was awarded special honors in French and Italian. She was also elected as a member of Phi Beta Kappa, the honorary scholastic society.

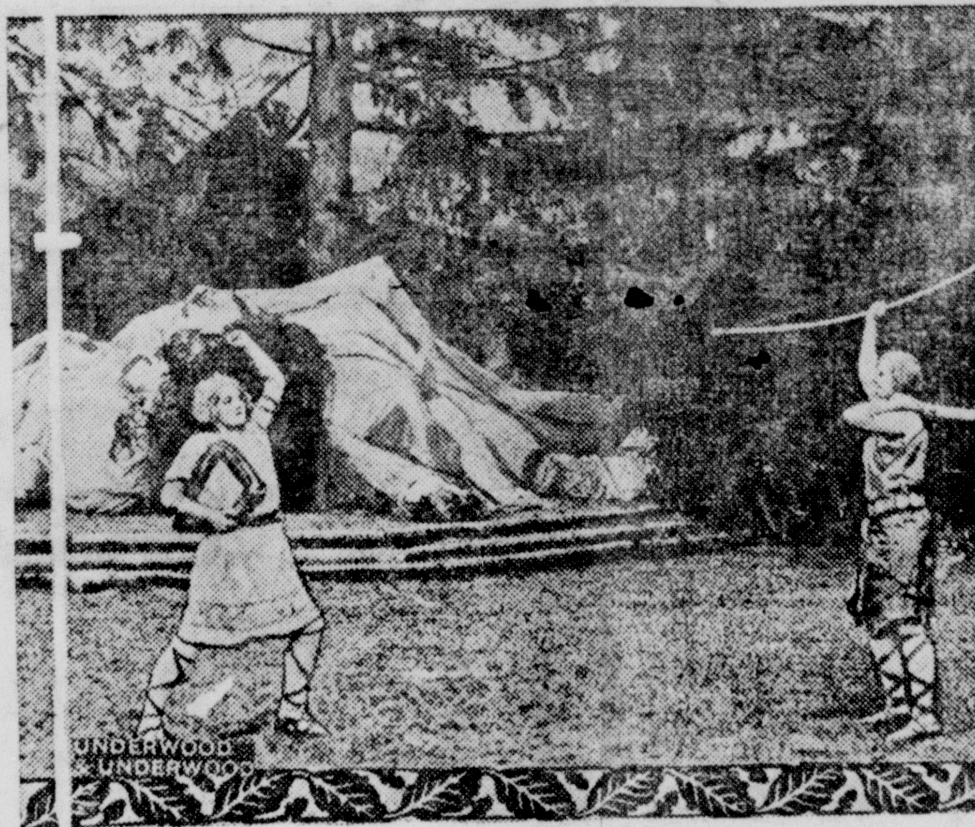

ELECTRICITY SERVED FREE.

During the heavy thunder storm Monday morning at 12:15 o'clock lightning struck the chimney at the home of Mr. and Mrs. Cyrus Abernethy, North Court street. The visitor did not do much damage, beyond tearing the top out of the flue. The jar woke up the occupants of the house.

DELIGHTFUL TRIP.

Dr. and Mrs. O. H. Dunton and daughters, Misses Florence and Helen have gone for an extended visit in Maine and Massachusetts. The trip is being made by automobile.

Musical Play Presented by Girls of Vassar

Scene from "The Bones of Weyland," the musical play based on folk lore which is this year's commencement production by the students of Vassar. In the college's outdoor theater. The girls shown in the picture are, left to right: Winifred Comstock, New York; Florence Clothier, Wynnewood, Pa.; and Editha Day, Summit, N. J.

OLD PICKAWAY SETS THE PACE IN CLUB TOUR

Nearly Eight Hundred in Crowd That Visited Ohio State University.

Thursday, July the ninth, 750 Pickaway county farmers attended the Boys' and Girls' Club tour. Those from the southern half of the county gathered at Circleville, leaving in a group at 7 o'clock. The northeast townships were waiting along the Scioto Trail and joined the procession when it came along. The northwest group gathered at Commercial Point.

Columbus motorcycle officers met the tourists at the Jackson pike and Scioto Trail entrances to the city. The machines were lined up and escorted thru the Columbus traffic in a body. All side street traffic being halted until the 150 machines had passed.

The entire 750 boys and girls and men and women were shown thru the Ohio penitentiary. The traffic officers lined up the machines again and took the party to the university.

Each township provided a complete meal and the folks from each township ate together. Ice water was furnished by the dairy department. The traffic officers were given the meal of their lives as they termed it.

After the meal, W. H. Palmer, State Boys' and Girls' club leader, Senator C. C. Chapplear and Dean Alfred Vivian gave short talks. The dean expressed his appreciation of the Pickaway county spirit that it took to make up the largest Club tour ever visiting the university.

Several clubs participated in giving club yells. Deercreek and Pickaway youngsters were lined up and competed in a match box passing game. Nose to nose with no hands used was the contest; Pickaway won.

The men and boys were then taken to the university barns and the best livestock was put on parade. The boys had the chance to see the best Percerton stallion in the world and the world's record Holstein cow. One boy was asked the best point about the cow. He quickly remarked, "The milk she gives."

The ladies and girls were shown the stadium, flower gardens, museum and other points of interest.

The tourists started home at four o'clock; the traffic officers saw them safely to the city limits.

RADIO FANS TUNING IN ON PROGRAM

Wednesday's five best radio features.

LANCASTER WOMAN HURT. Boulder, Colo., July 13, (UP).—Miss Lou Effinger, 23, of Lancaster, Ohio, was seriously injured yesterday afternoon in a snow slide down Arapahoe Glacier. She was taken to Boulder hospital where physicians say she was suffering from an injury to her spine.

DOUBLE PAY TO THE PRISONERS IN WORKHOUSE

Dayton, O., July 14, (UP).—City workhouse prisoners are now receiving double pay.

Thru the passage of an emergency ordinance recently by the city commission they are receiving \$1.50 a day instead of the old wage of 75 cents a day.

The increase in pay was made because in the opinion of the commission the amount of work done was far in excess of the old wage scale for the hours employed.

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices.

Suit In Partition.

George G. Lindsey has filed a civil action in partition against Ida Mogan and others in the estate of Wayne G. Lindsey. Barton Walters represents the plaintiff.

Judgments by Confession.

Dorothy Reynolds has secured judgment by confession against Anna E. Strawder and S. Strawder for \$3,572 and interest at eight per cent from July 13, 1925, and also one for \$2,200 with interest at three per cent from March 10, 1925. George G. Adkins represents the plaintiff and C. A. Weldon, the defendant.

Marriage License.

Elmer C. Wright, 25, electrician, Columbus, and Margaret A. Hubbard, 23, Ashville.

SOCIAL CALENDAR

Mrs. Fred W. Heath and son, and Mr. and Mrs. Bennett Heath, of Muncie, Indiana, and Mr. and Mrs. Charles H. May, of this city, attended the 75th birthday anniversary of James O'Day at Mt. Sterling Sunday.

Mr. and Mrs. Albert Hill delightfully entertained forty relatives and friends at their home in Darbyville July Fourth. Promptly at 5 o'clock everyone was seated and the well filled plates were passed by Misses Mary Louise Ruth, Thelma Hill and Elnora Hill, all of Columbus. Ice cream and cake was served to fifty. All had an enjoyable time. Several were prevented from coming because of the storm.

SHOE COMPANY PARTNERSHIP IS DISSOLVED

W. E. Crist Takes Over Avis Store and Lawsuit is Dismissed.

W. E. Crist, who instituted dissolution proceedings against The Avis Shoe company, has withdrawn the suit has taken over the stock and assumed the debts and liabilities of the firm, thus releasing his partner Mr. Avis, who has retired from the business.

The stock will be disposed of by Mr. Crist.

It is understood that Mt. Avis together with Ross Kirkpatrick will open a shoe store in the near future under the style firm name of A & K Shoe company. Milt Morris represented Mr. Crist and Barton Walters and M. C. Seyfert were attorneys for Mr. Avis.

HAPPENINGS IN OUR STATE

Taken Direct From the Wires by Correspondents of the United States Press Association.

(United Press)

Columbus, O., July 14—Commercial law enforcement was on the "black list" beginning today, when the Bender act prohibiting fee-splitting became a law.

The business of fee-splitting that has been indulged in by town and county officers had become a "good business proposition." Under the terms of the new law such a condition in the enforcement of law is eliminated.

Columbus, O., Added authority was vested in the public utilities commission. The new act specifying changes in regulation of motor truck lines becomes a law at midnight Wednesday.

Under this law the commission has absolute power to regulate the granting and refusing of certificates of public convenience to all forms of commercial transportation. Before this their power was limited to bus lines.

ABANDONED FORD.

A Ford touring car abandoned near this city, was brought in this morning by Sheriff Young and it was found to be the property of Lola Bush of Junction City. The car had been stolen. It was short on gasoline when found.

JAILLESS CITY MT. VERNON IS IN QUANDARY

Mt. Vernon, O., July 14, (UP).—Mount Vernon is a jailless city. They have the prisoners but no jail to take care of them.

Until recently the city prisoners have been kept in the county jail. The Knox county commissioners, however, objected to the keeping of city prisoners in the county jail without remuneration to the county. The city has the alternative of building a jail or paying for the support of its prisoners.

The decision of the commissioners came without warning and found the city council unprepared to meet the emergency.

HONG SLING

Hong Sling, declared to be one of the richest men in China, has been in this country visiting his son, who is a student at Yale. Hong Sling was a track laborer on the Union Pacific railroad in the eighties. Now he is a banker.

EARL PARKER DEAD.

Earl Parker, of 595 Allen avenue, the son of Sherman and Minnie Parker of this city, was born in Greenland, Ross county, on September 2, 1886, and died at the Mt. Logan sanatorium at 9:30 o'clock Saturday. He married Osie Bowdle on May 9, 1916. His wife, one daughter, Hazel, one son Ernest, his parents, one sister, Mrs. Bertha Thomas, of Ashville, and two brothers, Wilby and Golden, both of Columbus, survive.

The funeral services were held at Brown's Chapel at 2:30 o'clock Tuesday. Rev. Wetzel officiated and interment was in Brown's Chapel cemetery.—Chillicothe Scioto Gazette.

THE WEATHER.

The thermometer touched 50 degrees above zero Monday night and made some people shiver. Sunday night the mercury stood at 70 degrees.

STOP ACCIDENTS.

Help in the campaign to promote careful automobile driving. Get one of the windshield posters at Bob Brehmer's. They are attractive and help keep in the public eye the campaign to "stop accidents." The posters are free to anyone, driving any make of car. 11julyd3w1.

Born to Great Name and Great Traditions

A son born to Dr. and Mrs. George Bolling Lee is an event of wide interest to the people of the United States, particularly to those of the South. That he will bear the name of his celebrated great-grandfather, the leader of the Confederate forces, should be a source of much gratification to all who have in them the faintest vestige of sentiment, the Richmond Times-Dispatch announces.

Doctor Lee is the only living direct male descendant of the southern chieftain. The death about two years ago of his brother, the third Robert, left him to hold a unique distinction. And the distinction carried with it a heavy responsibility, for it would have been a real pity, sentimental, if not actual, for the male line from General Lee to have been broken.

The little newcomer is the fourth R. E. Lee. The first, of course, was the great southern commander in chief; the second, the general's son, who rose to the rank of captain in the Confederate army, and the third, Colonel Lee, whom thousands of contemporary Virginians remember as the general "Bob," son of Maj. Gen. William Henry Fitzhugh (Rooney) Lee.

The fourth Robert has been born into the world as the child of fortune. If he is not wealthy in material things of life, he is fabulously rich in the high traditions that have come down to him through a long line of most distinguished ancestors. No blood to be found in any part of the globe is better than his; he is an aristocrat of aristocrats. His great-grandfather was the finest flower of Anglo-Saxon civilization, the possessor of a mind and heart that have added luster to the history of the race.

But, if his is a great inheritance, it entails no light responsibility. He is heir to a place in the hearts of his people that will be extremely difficult to fill. To bear worthily the name of R. E. Lee is no easy task. Men will expect much from young Robert. May he have the strength to live up to their expectations.

Writer Speculates on Possible "Dog Heaven"

Been thinking again. Been sitting scratching my dog's ear and thinking. Nice little dog. She has more sense and more humanity almost than lots of humans whom I have met up with. What a wonderful thing is the love and care of an animal for her young! People have been coming over to see her puppies—three ugly little bull pups, with not much to see but wrinkles, says a dog fancier in Adventure Magazine.

Yesterday they disappeared mysteriously from their nest in the corner of my little barn. I looked round and by and by found them. She had dug a large round hole under the house and there she had taken them. I brought them out to the lawn. She smiled at me, in a superior and motherly manner and promptly lifted one by his hind thigh and bore him away to her newly made nest. In a very few minutes they were all back under the house. Then she came and looked up, smiling at me, and requested me to scratch her under the ear. It would be rather nice if there actually were a dog star, would it not? When we might in the hereafter meet up with our old dogs and hear just what they had to say.

Our line of groceries, vegetables and selection of meat is complete. See us, 19junedtf. HENN BROS.

We have business properties and business propositions that will make you think.

THE HARTMAN REALTY CO
Room 9, I. O. O. F. Building
Phone 105, Circleville, O

The complete trust and comradeship that a dog offers to a man is a lovely thing. Too bad so many men are not even fit for the trust of a little yaller dog! It is such an unwavering and utter trust. It ought to make a man the better, causing him to sense something of his responsibility to the animal creation. Don't you think so?

It would be rather correct, I think, if in the hereafter there is a dog star in which the dogs will live happily together with all the doggy affairs arranged to suit themselves. Then, perhaps, those humans who in this world have been unworthy of the confidence of their dogs will be led round on chains and fed upon old bones, and occasionally dipped in sheep dip to kill their fleas, eh? Shut in the pound and left there till some dog comes along and agrees to pay for their license?

How's that for an idea, now? Think I'm mad for sure, don't you? Well—maybe I am, but it was the mother of the puppies below my house who put me wise to it. You'd better look out. Maybe you will have to wear a muzzle yet, in dog star land.

Panama's Noah's Ark

Barro Colorado Island was formed

when the valleys about it were flooded by the impounding of the water of the Chagres river to form Gatun lake, says the Detroit News. It resembles Noah's ark in that there gathered as the waters rose nearly every form of animal life in the vicinity, seeking escape from the rising flood.

Despite that it is only two miles from the Panama river, it has been found to harbor amphibians of new and strange habits as yet unstudied and innumerable species of insects never described, as well as many strange and exotic plants, numbering 2,000 or more. It abounds with anteaters, sloths, armadillos, peccaries, tapirs, agoutis, coatis, the ocelot, the jaguar, many species of bat, monkeys of various kinds and the famous black howlers.

Woman Ranks With Man in Intellectual Force

There is a small group of scientists to whom women owe an everlasting debt of gratitude. These are the psychologists who have produced the mental yardstick—the intelligence test—and have thus furnished the fairer sex with the final convincing argument to refute the ancient and

odious charge that women have less brains than men.

The intelligence tests have given the scientific answer to the question: Who are more intelligent, men or women?

And the answer is so conclusive that it leaves no room for appeal or evasion. The test scores of hundreds of thousands of children and young people of both sexes in schools and colleges have furnished the evidence. One noted psychologist declares that according to numerous tests he has made on school children under fourteen years the girls actually score one or two points higher than the boys.

Still another point of difference between the sexes, as revealed by the tests, is that women's scores do not fluctuate either above or below the average nearly so much as do men's. The very high grades—also the very low ones—are generally made by men. Nature always equalizes. And when the grand average is drawn we discover that the ancient notion of masculine mental superiority is a hoax.

The extremes reached by men in the tests may perhaps give us the clue to another reason why the world has produced a few men geniuses, but no women—and why the institutions for the feeble-minded contain more men

than women. It is from the highest levels that the genius comes, and from the lowest the nut. And, as we have just learned, both of these levels contain more men than women. The fallacy of the past has been to consider these few intellectual prodigies as samples of the whole male half of the race. We must, therefore, conclude that the woman given to our father Adam was not only bone of his bone and flesh of his flesh—as the theologians tell us—but also brain of his brain. The sons of Adam and the daughters of Eve are possessed of the same intellectual equipment.—Kingsley Grey in the Designer Magazine.

Page Howard Carter

The leader of the orchestra was not particularly youthful, although she tried to be. After a particularly vigorous but fatiguing number, a wag in the third row chirped: "I'll bet she saw the last eclipse."

Value of Farm Crops

According to the census bureau the total value of farm crops and live stock in 1923 was approximately \$16,000,000,000.

Lumberjack Idea Used in Summer Sweaters

Knitted outerwear is to be worn by the summer girl. The illustration shows the "lumberjack" idea in knitted fibre silk of red and white, for wear with or without a blouse.

Get Correct Size When Buying Silk Stockings

Silk hosiery economy begins at the store counter. Getting the correct size is important to prevent strain. But getting a sufficiently large size does not mean that you must get an excess of material and have a bulging looseness around the ankles.

Why is it that so many women think their stockings must fit them skin-tight, just like their gloves? This is at the root of much of the stockings dissatisfaction, for after wearing a pair of tight-fitting stockings a few days invariably the big toe begins pushing its way right through the end.

When every woman learns that a stocking should be at least a quarter of an inch longer than the foot to give the right kind of wear and service, not only will stockings look better, but they will give greater service. Skin-tightness spells garter runs and destructive "ladders."

For instance, if you are a woman who always takes a nine size, and you discover that it fits at all snugly over the toes, the next time you go to buy stockings you should ask for a nine and one-half. This will enable you to get the service out of your hosiery to which you are entitled, at no sacrifice whatever in good looks or appearance.

It is very important to get a stocking that fits the leg as well as the feet, though perhaps not many women remember that point when shopping for hosiery. Some women have the type of leg which begins to enlarge very quickly just above the knee. For her there is a type of stocking designed that is wider above the knee just where the extra fullness is required. And for the very tall woman there are stockings which are elastic at the top, and which will fit well on the leg. There are even "out-sizes" of hosiery which may be obtained by the woman of radically different proportions, and no one can estimate what these mean in increased wear, as well as comfort and fit.

To lessen the annoyance of "ladders" it is well to select silk stockings with a garter-run-stop, sometimes called anti-run-backs or ravel-stops. It is a device for arresting any "runs" caused by the garters in the tops, before they get down into the body of the stocking. It is usually located just below the garter-top, which is a double thickness of the fabric, designed to give elasticity and greater strength to the tops of the stockings. In silk stockings the top is frequently made of mercerized cotton, which gives greater resistance to strain than does the silk.

Keep Scalp Healthy to Have Beautiful Hair

No matter what its condition may be—whether oily or dry and brittle—constant scientific care will bring life and vitality and silken sheen to your hair.

"Steal a half hour weekly from your crowded life to pay tribute to the value of beautiful hair. This half hour will keep your scalp healthy and relieve you of worry about oiliness or about dry, lusterless hair. First, brush through to the scalp to loosen dust or dandruff; then, parting the hair at intervals, rub well into the scalp with a bit of absorbent cotton, some good cleansing, nourishing tonic.

"A brisk rubbing of scalp and hair with a soft towel removes excess tonic and then you are ready for the massage. Begin at the nape of the neck and, with a firm, circular movement of the fingers, work over the entire scalp—lifting, pressing and kneading.

"This process absorbs most of the tonic, and the final brushing—upward, outward—carries it to the ends of the hair."

Hat Trimmings

The new aigrette, which is not made of real feathers, trims many satin hats. Black and colored hats in panne and velvet are also extensively feather-trimmed. One of the new big black panne hats with poke brim is trimmed with a bunch of aigrettes on the left side. A golden brown panne is used for a wide-brimmed hat trimmed with glycerin feathers of the same color.

MUCH LIKE CAMERA IS THE HUMAN EYE

Optic, However, Infinitely Superior in Operation.

Quite simply, the eye is a camera, with a series of lenses arranged in a dark chamber; the iris serves as a shutter, and the object of the whole apparatus is to form on the retina—the sensitive plate at the back of the eye—an image of the object photographed, says a writer in My Magazine, London.

When a beam of light comes from the object it passes through the cornea and other layers of the outer part of the eye. All of these substances are rather complicated. But think what happens.

An ordinary photographic camera needs painstaking adjustment in order to obtain clear images of near or far objects. An opera glass must have its lenses screwed backward and forward. So must a telescope, in a much more prodigious way. But the eye focuses itself on near or distant objects without winking. It is as quick as thought. This is what is called the eye's power of accommodation.

What the eye does is first to contract the pupil, making it smaller when looking at a near object, and then to alter the front surface of the lens, making it more curved, or, let us say, more convex. When the eye shifts its gaze from near to distant objects the eye lets the front surface of its principal lens get a little larger and flatter. It does not do all these things without our knowing it; we wish it done, and it is done. But we scarcely realize the number of eye muscles, six at least, which are called into play when focusing.

As for the sensitive plate behind the eye, that is even more wonderful; and, after all our study of it, it is not altogether understood yet. It is a plate with ten layers, of which the most important that we will mention are the rods and cones, the granular layers and the nerve-fiber layers.

The rods and cones are really the ends of the nerves that lead to the brain. They are sensitive to light, which is to say that when the beam of light coming through the lens falls on them it actually alters them. In the outer parts of the rods there is a stuff called visual purple, and when light falls on this it first becomes yellow and then colorless. The visual purple is, let us say, the chemical of the photographic plate of the eye.

But the really wonderful thing about this retina, and all the layers of which it is made up, is that it is not merely sensitive to light; it can tell what sort of light. It can distinguish color. It is for ever taking instantaneous moving color photographs. It has a wonderful command of color. It can see, not merely the chief colors, the big six—red, orange, yellow, green, blue and violet—but all the mixtures and gradations of these.

It has been noted of them that they can be arranged by the eye in octaves, and a great painter usually employs a range of four octaves, or 32 hues

Painful Pleasures

"There's no pleasure without its pain." "That's so. Even breakfast in bed has its crumbs."

Hardly

Hewitt—Money talks.
Jewett—It can't when it goes so fast it gets out of breath.

Mistaken Identity

"Laws, mose, why you s'pose them flies follows us so close?" "They ain't flies. Them's buckshot."

Sympathy

Joe—"I've got a bad head this morning." Bill—"I'm sorry, Joe. Hope you'll be able to shake it off."

Veteran Looks Back

The editor of the bright Clarksdale Journal is Ajax Fleming, and he reminisces as follows:

"Almost 59 years ago the writer, a freckle-faced, spindling kid, started on the downward road as printer's devil in the Palmyra Spectator office. Three years later he was a journeyman printer in the old Hannibal Courier office, and in 1872 printer, reporter and editor. For more than 50 years he has been a writer on the Missouri press, and as to service is the oldest active editor in the state. He has had the double honor of having been called 'the boy editor,' and now the dean of the active fraternity. It has been a work of love and we've never

regretted that we 'learned the trade.' We have had our ups and downs, mostly down, but never out. Not one do we recall living who was in the writing game in 1870-72. If we ever get the Journal where we will not have to be editor, printer and devil—the entire works—we hope to hammer out a few chapters about the people and things of other days."—Atlanta Constitution.

Britons Eat More Raisins

The time is passed when the measure of the value of a memorial is quantity. I hope the time has come when that measure is quality. I care not whether the material be marble or granite, its future will be measured by the character of the design. It is quality that has preserved for us the finest examples in painting and sculpture. It is quality that will stamp our imprint upon cemeteries of the future. Simplicity, correct lines and proportions and proper ornamentation are the real fundamentals. A design that is right, material that is lasting, and perfect workmanship, spells success for the future of this industry and the beautification of the cemetery. Will you let me help you select the memorial for your lot. Call at show room. **NO AGENTS.**

Only Wings Necessary

A hundred and twenty years ago people were evidently inclined to make greater demands upon their "help" than they are today. The following advertisement was clipped from Farmer's Museum, published in 1796: "Wanted, for a sober family, a man of light weight, who fears the Lord and can drive a pair of horse. He must occasionally wait at table, join in household prayer, look after horses and read a chapter in the Bible. He must, God willing, rise at seven in the morning, and obey his master and mistress in all lawful commands; if he can dress hair, sing psalms and play at cribbage, the more agreeable. N. B.—He must not be familiar with the maid servants, lest the flesh should rebel against the spirit and he should be induced to walk in the thorny paths of the wicked. Wages 15 guineas a year (about \$7 monthly)"

Beware of Moths, better be safe than sorry. Have your winter garments thoroughly cleaned and pressed before packing away for the season. Get a Moth proof bag free at

CHARLES H. MAY
PYTHIAN CASTLE

IN MEMORIAM

Editor Union-Herald: — Benjamin Franklin Long, son of James M., and Mary A. Long, was born in Pickaway county, Ohio, June 8, 1860, and departed this life June 13, 1925, at the age of 65 years and five days.

He was united in marriage to Rosa B. Rector on January 16, 1886. To this union were born twelve children, four girls and eight boys. Three children, Ruth, Frank and Guy, have gone on before.

He leaves to mourn his departure his wife and nine children; Asa Long, London; Mrs. Beatrice Price, Plain City; Burdell Long, West Jefferson; Mrs. Ida Emrick, Richmond; Cecil Long, West Jefferson; James and Gilbert Long, of Columbus; Ethel and Ralph, at home; a sister, Margaret Boyssel and a brother, James R. Long. He was a devoted husband and father, always considering everything with love and kindness for his family.

He was a faithful and loyal soldier of the cross. He united with the Methodist church when a young man and always lived a consistent Christian life.

During his recent illness he often quoted the 23d Psalm. Thru all his trials he saw the bright side of life. On Sunday before his death his children gathered to celebrate his birthday anniversary. In the afternoon he requested a devotional service be held. He was so happy and said that he was in the Lord's will, ready to go at His call.

The funeral was held at the Church of Christ in Christian Union by Rev. Frank Sollars and Rev. Nelson, with interment in Pleasant cemetery, at Mt. Sterling.

TED LEWIS

In an ably written article in this month's issue of The Dance Review, a New York publication devoted to art of dancing, Ted Lewis (Theodore Friedman) has an article on Jazz music. The article is handsomely illustrated, with a full figure of the jazz king himself.

Circleville	1	0	1000
London	1	0	1000
Washington	0	1	.000
Wilmington	0	1	.000

Sunday's Results

At Circleville — Circleville, 9; Washington 2.
At Wilmington — London 7; Wilmington 4.

The second half of the baseball season of the South Central Ohio League started off very auspiciously for the Circleville Eagle team yesterday when they took the measure of the Washington team, winners of the first half season, by a score of 9 to 2.

This was the first appearance of the Washington team here this season and unfortunately the breaks of the game made them appear to be a much weaker team than they really are. They really have a high class aggregation and it will take real ball playing to beat them out on the season.

A big crowd was out to see the contest and they certainly all got full return for their money as the contest was full of thrills and was a really spectacular affair up to the seventh innings when Circleville fell on Borst's delivery for four safe wallops, and the visitors crowding all of their fielding miscues in this frame, the locals struck around and drove five runs over the rubber.

The first six frames was a pitching duel between Dewey and Borst, with Dewey holding the edge on Sammy but having a two all score because of a slip up on his support.

Washington got away to an early lead in the first when Dewey gave his only free passes of the game to Doyle and Miller in succession. After Jones had popped to Rife, Noon hit to Miller at first forcing Miller at second, Doyle taking third on the play, Dewey tried to catch Noon at first and in getting back to the bag he placed his spikes on Os toe and Doyle crossed the pan before Os could recover himself for the throw.

The other Washington run coming in the sixth, was also a gift. Jones led off with a single

and Doyle's perfect bunt put him on second and Rife having also gone after the bunt third base was left uncovered and Jones kept on going, reaching the sack safely. Miller then hit to Rife who threw to the plate to cut off Jones and Targee dropped the ball.

Circleville's first two runs were examples of inside base ball. In the fourth inning with two gone, Targee hit safe, stole second and scored on Pettit's line drive to center. In the fourth Tommy Thompson walked and went to second when Donahue dumped the ball in front of the plate. Dewey then rose to the emergency and drove one to left center that brought Tommy home.

In Circleville's big seventh inning Donahue, Rife and Flood singled, Targee doubled and Dewey received a base on balls. In the eighth Donahue led off with another hit but was doubled with Dewey when Bradley threw to second from a sitting position after he had fallen over fielding the ball. With two down Rife hit safely and scored ahead of Allen when the latter put the ball out of the lot through the left field fence.

Sollars in left for Washington, pulled one of the most sensational plays ever seen in Circleville. In the sixth with two out and men on second and third, Thompson hit down the left foul line. Sollars took the ball at full speed with a back-handed catch in his glove hand. The ball was ticketed for a sure three bases as Tommy was at second when the catch was made. Tommy himself also pulled a circus stunt when he fell over backwards in fielding a ball from Doyle's bat and recovered in time to catch the runner at first with a perfect peg.

On next Sunday Wilmington will play in Circleville while Washington is entertaining London. Circleville will have five at home games during the second session of the season.

Zambesi Falls Called Inferior to Niagara

The Victoria falls are located on the Zambesi river, in Rhodesia. They are more than twice the height and somewhat wider than Niagara falls. The native name is Musi-oa-tun-ya—"Thundering Smoke" or "Smoke Does Sound-Here."

The Zambesi, one of the four great rivers of Africa, is more than 1,700 miles in length and carries an enormous volume of water, so that the falls are a magnificent spectacle at any time of the year. But this volume of water is not as great as that which pours out of our lakes, and it is in this respect that the Victoria falls are inferior to Niagara.

The African cataract is divided by islands so that it forms four falls, two wide and two narrow. Near the right bank of the Zambesi is the Leaping Water, a fall 108 feet wide; then Boaruka island; then the main fall, 1,419 feet wide; then Livingstone island; then the Rainbow fall, 1,605 feet wide; then another island; and finally the Eastern cataract, which resembles the Leaping Water.

The Victoria falls occur where the Zambesi is at its widest. They fall over an edge which is almost vertical, but instead of falling into an open basin as Niagara does, they drop into a chasm the opposite wall of which is only 80 by 240 feet away. The outlet of all this water is a gorge 300 feet wide, which leads a little farther on into a Grand canyon 40 miles long.

The falls were discovered by David Livingstone on November 17, 1855. They are on the route of the Cape-to-Cairo railway, and a bridge 650 feet long has been constructed across the canyon some distance below the falls.

Fog Injurious to Birds

Fog affects the birds and beasts at the London zoo to such an extent it has been decided to install electric lights to temper the dampness and darkness caused by the moistened haze and coal smoke that creeps into all the cages when fogs are at their height.

PERSONALS

Mrs. Leon Van Vliet spent the day in Columbus.

Miss Henrietta Davis spent the day in Lancaster.

Miss Winifred Parrett spent the day in Columbus.

Miss Clara Southward spent the day in Columbus.

C. K. Howard was a business visitor in Columbus today.

Thomas Hedges has returned from a trip to Niagara Falls.

Mrs. Roy Kuntz and son, Welter, spent the day in Columbus.

Misses Edna and Wilda Chambers spent the day in Columbus.

Ralph Barnhart and Dorwin Dumm spent the day in Columbus.

Mrs. Leslie May and son, Donald, spent the day in Columbus.

Mrs. G. E. Thornton and Miss Sarah Lynch spent the day in Columbus.

Miss Mary Weiler and Dwight Weiler spent the weekend at Niagara Falls.

Miss Nell Baird, of Zanesville, is the guest of her nephew, Rev. Robert Lee Baird.

Miss Genevieve English spent the day with her sister, Mrs. John J. Ryan in Columbus.

Mr. and Mrs. R. D. Harman, of Belle Center, are guests of Mr. and Mrs. C. E. Wright at Duvall.

Mrs. S. M. Graumlich and daughter, Mrs. Elgin Merriman, and son, Neillynn, spent the day in Columbus.

Mr. and Mrs. C. F. Abernethy and Mr. and Mrs. H. W. Plum and son, Ned, attended the funeral of Glenn Nigh at Mt. Sterling today.

Mrs. Channing Vlerebome and daughter, Elizabeth Ann, spent the day in Columbus the guests of her parents, Mr. and Mrs. J. O. Smith.

Mr. and Mrs. Joseph Tarbill, of Pasadena, California, Miss Edna Wharton, of Chillicothe, are guests of the Misses Grimes, of East Main street.

Mr. and Mrs. D. C. Hornbeck of Columbus; Taber Adams, Mrs. Nell Halverstott, Mrs. Clara Cass and Lenox Reber, of Marion, Mr. and Mrs. T. R. Bell, of Youngstown, attended the funeral of Miss Caroline Bell Monday afternoon.

Notice to Next of Kin.

PROBATE COURT, PICKAWAY COUNTY, OHIO.
In the Matter of the Will of Wayne G. Lindsey, Deceased.
No. 9438.

NOTICE OF PROBATE.
To Ida Mozan, George G. Lindsey, Neill W. Lindsey, John E. Lindsey, Nellie F. Davis, Lucy Rooney, Lyman C. Lindsey, William Lindsey, a minor aged 17 years and Clara Lindsey, a minor aged 17 years.

You are hereby notified that on the 13th day of July, A. D. 1925, an instrument of writing, purporting to be the last will and testament of Wayne G. Lindsey, late of Circleville township, in said County, deceased, was produced in open court, and an application to admit the same was on the same day made in said Court. Said application will be for hearing before said Court on the 15th day of July, 1925, at 9 o'clock A. M. Witness my signature and the seal of said Court, this 13th day of July, 1925.

14julyd1.

JOSEPH ADKINS, Probate Judge.

98c Bath Powder, one box of Talcum Powder both for \$1.00

Devonshire 39c quality fine for school clothes 4 yards for \$1.00

HOME FROM CALIFORNIA.
James Reichelderfer has returned home from a five weeks' visit in California. He was the guest of his daughter, Mrs. Fred J. Jackson, at Montara, a suburb of San Francisco. He also visited Santa Barbara, the city recently stricken by an earthquake. He met a resident of Lorain, Ohio, who said the damage wrought by the quake was not nearly as great as that done by the cyclone that struck Lorain.

Really Helpless, You Know
The prize excuse was introduced in an English court during the trial of a man charged with wife-beating. A neighbor who was present during the assault was called as a witness for the prosecution. He described the blows in detail and the wife's helplessness.
In astonishment the judge turned to the witness and asked: "Do you mean the court to understand that you stood by and saw this man strike the poor woman again and again?"
"Yes, I saw it all."
"And you made no effort to interfere?"
"I couldn't."
"Why not?"
"I was filling my pipe."

FOOT RULES
BY WISLER QUICKSTEP
RULE—Be foot cautious in the summertime.
EVERY pore in our bodies takes a breath as naturally as do our lungs so give your feet a chance to breathe. Our shoes are scientifically constructed and will help to keep your feet in a healthy condition.
"We fit your feet."
L.F. Smithhisler
BOOTERY
104 E MAIN ST.

TRY A GUN
"Madame," said the dignified gentleman, "your dog bit me on the ankle."
"He did?" cried the lady. "Oh, I must send for the doctor!"
"Oh, I assure you it isn't as bad as—" "You're the third person he's bitten today," broke in the lady. "I just know he isn't feeling quite well."—Legion Weekly.

Wisdom of the People
"A little nonsense now and then is relished by the best of men."
"Undoubtedly," answered Senator Sorghum. "The only trouble is that when you put a little nonsense into your talk it's liable to prove the only part that some of your auditors take seriously."—Washington Star.

BRUTAL TRUTH

Miss Ann Teak—Don't you think I look more youthful with my hair bobbed?
Mr. Hardfax—You sure do. One more clip and you'll be in your second childhood.

Both Toilers
The farmer and the sailor toil alike to some degree.
For where the farmer tills the soil The latter plows the sea.

Bird Life
"Never lived in the suburbs before?"
"Never."
"You'll enjoy the bird life on the place. This is a house for the bluebirds. And yesterday I saw a cuckoo on the lot."
"Good. I'll hang out an old clock."

A Difficult Case
Sleeping Beauty—If you think me pretty my hundred-year beauty sleep will not have been in vain.
Prince Charming—Say, if it took a century to make your face what it is now you'd better turn over and take another nap.

Viewed Tolerantly
"I like the springtime."
"Why?"
"Well, you see, I don't care for work at any time, but it is only in the spring that that attitude gets any sympathy."

INSIDE DOPE

"Say, why's the doc pumping out that fellow he thinks poisoned himself?"
"Trying to get the inside dope on his case."

Dismissing the Past
Republics are ungrateful, sure. For which we're all regretful. But many a statesman's more secure Because they are forgetful.

Premonition
"Did you expect me to accept you the night you proposed?"
"I did. Just before I reached your home I walked under a ladder and a dog howled three times."—Sydney Bulletin.

Her Job
"It's the little things that count," said the educational lecturer.
"Yes," responded the primary grade teacher, "but you can't imagine what a hard time we have teaching them to do it."

Quick Changes
Mrs. O'Gay—John, with my make-up on I could pass myself off as your daughter.
Mr. O'Gay—Yes, and with it off, my dear, I could pass myself off as your son.—New Bedford Standard.

The Lace Maker
Irate Customer—Here; look what you did!
Laundryman—I can't see anything wrong with that lace.
"Lace? That was a sheet!"

Shakespeare Revised
She—Hast thou heard that Shylock is once more wealthy?
He—Yes, he has been selling a correspondence course on "How to Lose Flesh."—California Pelican.

The Very Ideal
Old Lady—Surely a man like you could get a job in some business?
Street Singer—What, and sacrifice my career?

TRUE STORY
Of Fairfield's Belled Buzzard Told—Bell Placed On Neck
By J. T. Bowman 54
Years Ago.

At various times in the past year the belled buzzard has been reported at different points in Fairfield county, and in fact, the bird has recently taken up his abode near Sugar Grove. The big fellow is seen by the residents of that community almost daily.

It was popularly supposed that this was the buzzard liberated in 1864 in Georgia and the real history of the strange creature of the air was not known until today, when J. T. Bowman of Athens, a former Fairfield county man, told the following story to an Eagle reporter in Lancaster.
"In April, 1871, when I was but 11 years of age, I lived with my parents two miles south of Clearport on what is known as the Sam Spigler farm. Following a week of heavy rains, a straw shed collapsed one night killing a bull. We dragged the carcass with a team of horses down into the creek bottoms and the following day many buzzards and crows came to feed.
"It so happened that Will Simmons a playmate of mine had a pet crow and desiring to secure one myself, I set a trap near the body of the bull with the result that I soon caught a young turkey buzzard. I took it to the house and showed it to the family. My mother told me not to harm it. I then took a small brass sheep bell and using the same strap that had been attached to the sheep's neck I placed it around the bird's neck and liberated it.

"I remained on the farm until 21 years of age and then came to Lancaster where I lived continuously until eight years ago when I moved to Athens. During all of this time the bird would be reported as having been seen at various points in Fairfield and adjoining counties. From the years 1893 to 1896 the buzzard disappeared from this locality but was reported frequently from places in Indiana and Michigan. This was the longest period that the belled bird was reported away from here."

There can be no doubt of the veracity of this story, as Mr. Bowman is widely known here. His brother Albert, is now living near Clearport; two other brothers, George and Jack, live at Stoutsville and Circleville, respectively. All will verify his narrative.
Mr. Bowman is at present employed as stationary engineer with the Southern Ohio Electric Co., at Athens. For many years he served in a like capacity with the various Lancaster "plants."—Lancaster Eagle.

Modern France Surely Paradise of Children
The single child in France is the normal standard. He is petted by the whole clan of uncles, aunts, and cousins. At six years of age his own little world seems to revolve about him, eager to satisfy his smallest wish, to keep him amused, to provide him with pleasure. In the Luxembourg gardens I have been watching the children of France, and listening to their laughter before the guignol show—old Punch and Judy—in the Champs Elysees, and galloping pigs up in the great circus of the Boulevard de Clichy, Sir Philip Gibbs says in World's Work.

France is the paradise of children. Crowds gather round to watch them at play. The very eyes of the agents de police soften at the sight of them. I have just come from a christening of two babes in a little church in a low quarter of Paris. The whole congregation watched the ceremony with emotional interest. Two little lives added to France—that was good! Admirable! The father and mother were regarded with admiration and esteem. But what a risk, with the cost of living so high in Paris!
Going without breakfast may benefit the health, but it is likely to make one look baggy.

If one is so rich he can go on a trip whenever he likes it, he misses a lot of the fun of it.

MANY METHODS OF SIGNALING
Early Inventions for "Long-Distance" Talk.

The fabulous honor of being the first inventor of the art of signaling, says the Scientific American, is bestowed by certain classical writers upon the ingenious Palamedes, but it is certain that long before the time of the Trojan war the Egyptians and Assyrians, if not the Chinese and other nations of remote antiquity—of whom monumental records alone remain to us—had developed regular methods of signaling by fire, smoke, flags, and so on. Signals were passed from tower to tower of the Great Wall of China, and the Tower of Babel was a signal tower.

Beacons are "as old as the hills" on whose summits they were placed. Those lighted on Mounts Ida, Athos, Citheron and intervening heights conveyed information of the taking of Troy by Agamemnon. Leander was guided across the Hellespont by the signal lamp displayed by Hero in her tower at Sestos. One night the lamp was blown out—he was drowned, and she then threw herself into the waves. Theseus, in the Argonautic expedition, conveyed information by colors of the sails hoisted, but killed his father through a telegraphic error; for, flushed with victory, he forgot his signal, and old Aegeus, seeing the black sail, and feeling sure his son was dead, flung himself into the sea.

The use of mirrors to flash signals by the sun's rays dates back to the time of the pharaohs. The Persians are said to have considerably developed it for purposes of war.

The Persians, the Gauls and the Aztecs communicated by relays of sentinels shouting to one another, and Alexander, by means of the stentoraphonic tube, tactician Arnios communicated at night by means of a tall vessel containing water, which was let slowly by a tap at the bottom; on the water floated a cork disk carrying a gauge with divisions down the side, and on each division a separate sentence was inscribed. Each signalling point had one of these contrivances; and on a light being shown from one station it was acknowledged by the other, and each ciphers opened at the moment. When the surface of the water receded to the sentence required, the signalling station again showed a light, when the other stopped the outflow and read the words inscribed at the water level upon the corresponding gauge.

Hannibal erected watch towers in Africa and Spain to signal from; and whenever the Romans extended their conquests in Gaul, Spain or elsewhere, they made use of similar signalling devices. A representation of one of their telegraph towers is engraved on Trojan's column, and ruins of some of them are still to be seen in parts of France.

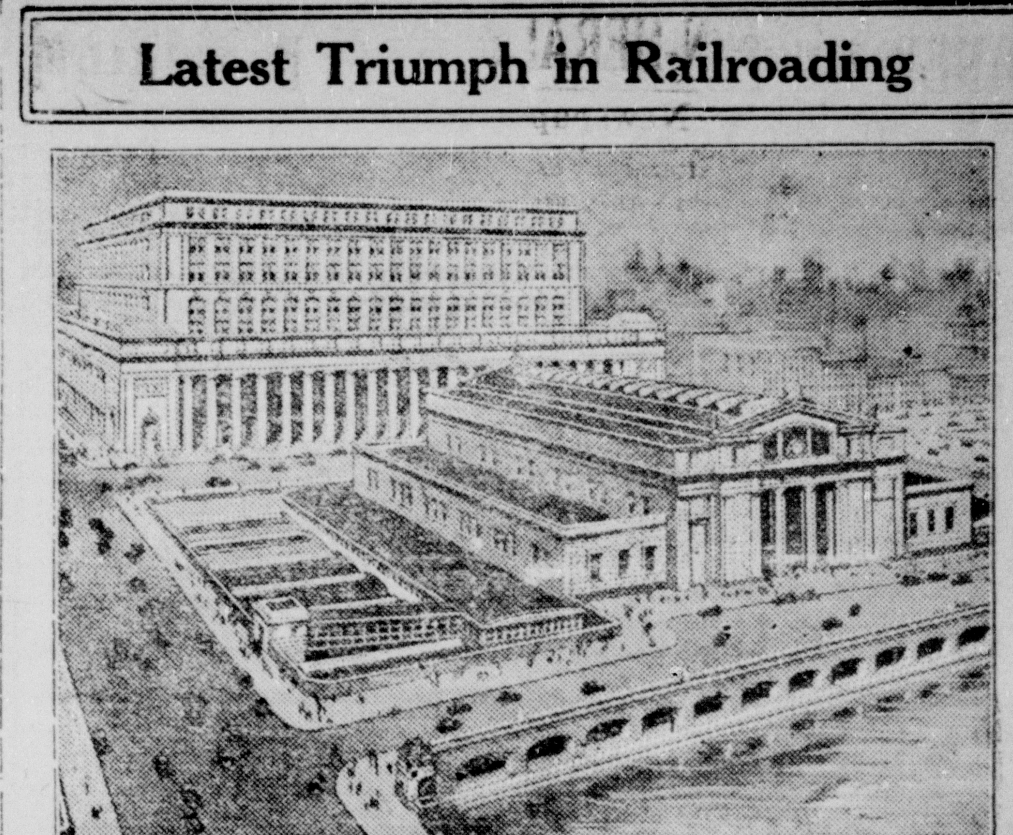

Don't Talk—Telegraph
A traveling man went into a railway restaurant and gazed discontentedly at the profusion of pies and cakes on the counter. "Haven't you got anything solid to eat?" he asked.
"Shall I give you some beans?" asked the proprietor, with his most persuasive smile. The traveler assented and, making short work of them, asked: "How much?"
"Twenty-five cents," was the bland response.

"What?" cried the drummer; "25 cents for a spoonful of cold beans?" The proprietor continued firm in his price, the man paid it and departed. But late that afternoon a telegram was handed in to the restaurant keeper, for which he paid 25 cents.
It ran thus: "Don't you think your price a little high on beans?"—American Mutual Magazine.

Alexandra
Alexandra, queen of Judea, the widow and successor of Alexander Jannaeus, was a wise and virtuous princess, who, contrary to example of her husband, studied to please her subjects and preserved peace and prosperity during her reign of seven years.
She died in the seventy-third year of her age, B. C. 70. She was the mother of Hyrcanus and Aristobulus and the latter years of her reign were disturbed by the attempt of her younger son, Aristobulus, to obtain the sovereignty, as he was exasperated by the favor his mother showed to the sect of the Pharisees and the authority she allowed them.—Chicago Journal.

Double-Decked Airship
Two separate decks and accommodations for 100 passengers are features promised in a giant airship of stainless-steel framework that is planned for traffic between England and India. Its motors are to use a heavy gas oil, eliminating the fire hazard to such an extent that passengers will be permitted to smoke during the voyage. A smoking room is included in the plans. The ship will be 720 feet long, 140 feet in diameter and will contain two-bed sleeping cabins.

Nothing to Cackle Over
Small Elizabeth was visiting on her grandfather's farm. As she walked hand in hand with her grandfather toward the barn, she heard a hen clucking loudly. "What's that?" she inquired.
"A hen," replied her grandfather. "She's laid an egg and she's proud of it."
Elizabeth looked up in astonishment. "Proud of it?" she exclaimed. "Why eggs as cheap as they are now!"

Latest Triumph in Railroading
THE completion of the new Chicago Union Station marks a noteworthy accomplishment in the history of important engineering undertakings, from which travelers from all parts of the United States will derive pleasure and benefit.

The station is without doubt one of the finest and most efficiently designed railroad terminals in the world. It forms a vital link in the realization of the "Chicago City Beautiful Plan." Simplicity, accessibility and convenience for the traveling public are the essential virtues of the new terminal. Rest and recreation rooms, ticket offices, barber shop, dining rooms, stores of various kinds, and almost every convenience known to travelers, are to be found on the one level, no steps to climb.

The main station is a low monumental type of building with a row of massive columns of classic design along the entire east front. Once inside, the traveler finds himself in a gigantic waiting room more than 100 feet high and brilliantly lighted through skylights in the great arch ceiling. Colonnades inclose the room, the walls of which are patterned after the architecture of ancient Rome. Bordering this room are the ultra-complete passenger terminal facilities. An innovation in railway terminal design is a conference room accommodating 125 people, which is available, without charge, to patrons of the Union Station lines for conferences and other meetings.

To give some idea of the immensity of the new station, it may be stated that the main building covers an area of about three acres with a concourse covering 60,000 square feet. The entire terminal facilities cover more than 35 acres and will expedite the prompt and satisfactory handling of 50,000 passengers, 400 tons of baggage and 300 trains daily with room for future expansion. Fifteen acres of glass were used in the various coverings over the train sheds, which extend more than 1,200 feet beyond the main structure. A total of 17,000 tons of structural steel, 175,000 cubic feet of Indiana limestone and 10,000 cubic feet of granite were used in the station building and concourse. The foundation consists of 449 cylindrical concrete piers from four to ten feet in diameter, reaching to a depth of more than 60 feet below the level of the Chicago river.

Those who have had the privilege of inspecting the new station pronounce it a marvel in terminal construction and are urging their friends to see it on their next visit to Chicago. The station is used jointly by the Pennsylvania Railroad; Chicago, Milwaukee & St. Paul Ry.; Chicago, Burlington & Quincy R. R., and the Chicago & Alton R. R.

Surely Paid Jim
Harry Tate is a well-known English humorist who has a peculiar brand of fun all his own. The irrepressible Harry tells the story how, at a meeting of a smallholders' club, a somewhat dejected-looking member was asked: "Do you think poultry-keeping pays?"
"Well, no, I can't say that I do; but I think it pays my son, Jim."
"How's that?"
"Well, you see, I bought him the fowls; I have to pay for their keep, I buy the eggs from him, and he eats them."

PICKED UP
What most we wish, with ease we fancy near.
The truest beauty is the beauty of a beautiful life.
Seemingly small opportunities call for careful handling.
Those who keep their word will never lose our trust.
Vanity is an able machine if it operates to benevolence.

A System of Farming That Brings Health and Prosperity

Every farm, regardless of the method of farming practiced or of the crops raised, should have at least a few good milch cows to provide
(1) Enough milk, cream and butter for home use;
(2) Enough skim-milk to raise some calves, pigs and chickens;
(3) Enough cream or butter to sell to pay, in part or entirely, current living expenses.
This plan has been a "life-saver" for thousands of farmers, especially during the hard times of the past two years. It insures a living, at least, and often other income besides.
Such a plan pays best with a De Laval Cream Separator. It soon pays for itself—and skims cleaner, lasts longer and is easier to operate and clean than any other.

**Flavors and Odors
of Milk From Feed****Precautions Must Be Taken
in Feeding Vegetables.**(Prepared by the United States Department
of Agriculture.)

When cows are fed such succulent feed as cabbage, potatoes, green alfalfa, green corn, turnips and silage, there is liable to be some noticeable flavor in the milk unless precautions are taken, says the United States Department of Agriculture. A great deal of experimental work has been done in the use of these feeds, and certain practices have been found desirable and practicable. The important facts brought out were as follows:

Feeding succulent feed before milking is likely to impart an undesirable flavor and odor to the milk.

The longer the time elapsing between feeding and milking the less pronounced will be the undesirable flavors and odors.

Feeding succulent feeds immediately after milking has little or no detrimental effect.

Prompt and thorough aeration of milk while still warm will remove slight flavors and odors and will lessen the intensity of strong flavors and odors.

The department's market milk specialists say that feeds may be one of the most frequent causes of abnormal flavors and odors in milk, and for that reason the feeding of the succulent feeds listed above should be done very carefully.

Sometimes the appearance of feed flavor or odor in milk alarms the consumer, and it may be to the interest of the producer or distributor to acquaint the public with the cause.

**Economical Ration for
Feeding Ewes and Lambs**

Experiments at the Ohio agricultural experiment station have shown that when the ewes are in good thrifty condition heavy grain feeding prior to lambing is uneconomical and does not increase the efficiency of the ration. A light grain allowance, however, is to be strongly recommended even though legume hay and corn silage make up a large part of the daily feed, for the ewes fed one-third to one-half pound of grain per head daily in addition to legume hay and corn silage weaned strong lambs and had an abundant supply of milk.

After lambing, the grain allowance should be increased sufficient to maintain the condition of the ewes as far as possible and to insure a good flow of milk. When the lambs have learned to eat grain, and they should always have a creep where they can eat without interference, the grain allowance of the ewes can be somewhat reduced without reducing the efficiency of the ration.

**Proper Plan to Supply
Bee Colony Foundation**

The cost of foundation is very small compared to the cost of letting the bees build it. If the bees build comb they have to eat a good deal of honey and stay in the hive to generate the comb. They seldom build comb except when there is a good honey flow on. By using foundation the beekeeper saves the comb builders much work, and thus provides many more field workers. Two advantages for comb foundation are as follows:

1. Combs built on foundation are straight and easy to handle.
2. Comb foundation is stamped for working bee cells, and the bees draw it out as it is started, and in this way avoid raising excessive numbers of drones.—E. S. Prevost, Extension Bee Specialist, Clemson College.

**Sheep Shearing Machine
Is Quite Satisfactory**

There are many methods of shearing sheep, ranging all the way from a pair of ordinary scissors to the finest machine clippers. Quite a few farmers at the present time are using hand shears. Probably the most satisfactory machine on the market now is the flexible shaft machine, which has an attachment for clipping horses and mules and another attachment, or flexible arm, for sheep shearing. This machine will cost somewhere in the neighborhood of \$30. Where several farmers in a community are growing sheep Prof. L. V. Starkey, chief of the animal husbandry division at Clemson college, suggests that they can co-operate by purchasing a machine and use the same machine for all of the small flocks.

FARM NOTES

Ten pounds of alfalfa seed per acre is about right.

The good farmer keeps himself and his farm well posted.

A handsome, durable, convenient farm gate is a three-fold blessing. Count 'em.

The crop we used to regard as a weed, farmers now regard as one of their most valuable crops.

The best way to appreciate fully the value of proper farm equipment is to do without it and figure the loss.

Sweet clover pastures carried from six to ten times as much stock as would native grass and with greater returns in milk and meat.

WHY PAY RENT?

MACK PARRETT

Here's New Theory
Prof. Nicholas Morosoff, an eminent Russian scientist and philosopher, has just published a somewhat sensational work in seven volumes, entitled, "Christ." In it he affirms that St. Basil the Great was the real Christ. He says it is not true that St. Basil, or Christ, was crucified, but he was punished only by being tied to a tree, the date of this event being March 21 in the year 808 of the present era, and that he lived eleven years after this date. The existence of the twelve apostles, he says, is a mere myth, which arose over the fact that St. Basil, or Christ, was surrounded by a

group of learned astrologists. Professor Morosoff says he bases his convictions upon intensive study of astronomy, astrology, philosophy and history while imprisoned twenty years by the czar. He was guided by "astronomical and rationalistic methods."

New Panama Laws

According to one new law in Panama, street signs must be in Spanish, another will compel the keeping of books in that language and still another imposes a fine if half the employees of a concern are not Panamanians.

Keeps Kitchens Cool

WHY fire up the old coal range and swelter while preparing the meals these terribly hot days? Why heat up the entire range just to heat a little water, or make a cup of coffee? Keep your kitchen cool and comfortable with an oil stove.

ALCAZAR

oil cook stoves are fully guaranteed by the factory to give perfect satisfaction. YOU TAKE NO CHANCES. No need to fire up the coal range and hold the fire all day. In less than five minutes you can have a "red-hot" fire for cooking and ironing. And when you have finished your work, turn your fire out.

We will gladly demonstrate our line of oil cooks, and will furnish you with the names of our users for reference.

Such a Cloistered Life

By MYRA CURTIS LANE

(© 1924, Western Newspaper Union.)

MRS. FRANK MURRAY was peeping out behind her curtains at the woman in the next garden. Mrs. Lillian Gates she called herself, and a widow, but every one knew who she was. They had known as soon as she took the house, a month before. The owner had said that if he had known she was the woman who figured in that notorious case of the millionaire he would never have rented it to her.

Plenty of money she seemed to have, but of course nobody would have anything to do with Mrs. Gates in a social way. Certainly Mrs. Frank Murray wouldn't. She was a pattern housewife, and a stickler for the conventions.

Nevertheless, she had watched Mrs. Gates furtively ever since she had taken the house next door. Mrs. Gates was always in her garden, planting flowers and shrubs. It was strange that a woman like that should care for flowers. Mrs. Murray associated her with the white lights and champagne.

And though she would never have admitted it to herself, Mrs. Murray looked on Mrs. Gates with a sort of envy. She herself had lived such a cloistered life. There were so many hidden phases of life that she had no desire to investigate—wicked things, like the existence of this Gates woman. Nevertheless, she was curious. Mrs. Gates aroused her curiosity. And envious—not to be like her, but envious of her experience.

Cloistered—that was what Mrs. Murray was, like thousands of her kind. Frank coming home every evening, and his dinner to be cooked—then little Tom to be looked after, and kept out of mischief, and bathed and dressed and played with.

The boy was the Murrays' idol. When the epidemic struck the town they were overwhelmed with anxiety about him. It was a malignant form of scarlet fever. Mrs. Frank Murray hardly ever peeped out at the woman next door.

The day came when, Frank being at the office, Tom came in with a flushed face and a sore throat. He complained of headache. His mother was in terror. She knew what that portended. She must have the doctor instantly. There was no telephone in the house. She ran out of the house in a distracted way.

"What's the matter? Can I help you?"
"Oh, my child's ill. The doctor—" "Have you no telephone? Come in. Use mine. No, let me call him!"
In spite of her fears Mrs. Murray found time to look about her in wonder at the tasteful interior of Mrs. Gates' house. She admired her white morning frock, her cool, well-bred tones over the telephone.

"He'll be right around," said Mrs. Gates.

The other woman thanked her impulsively and fled. She waited in agony for the verdict.
"Scarlet fever? Nothing of the kind," said Dr. Aston brusquely. "So long as you keep him from contact with other children there's no way he can get it. A feverish cold, and some derangement of digestion. Nothing to worry about. Keep him quiet and he'll be running about again tomorrow."

Mrs. Murray felt indescribably thankful. She smothered the little boy with kisses. Then she went on with her cooking. Everything was normal again. But presently something began to creep into her mind. She knew what it was. She had placed herself under an obligation to that woman next door. She must go in and thank her.

Reluctantly she changed her dress and went to the door. Mrs. Gates opened it.

"How is the boy?"
"It isn't scarlet fever," replied Mrs. Murray happily. "I—I just came in to thank you for your kindness—"

"Oh, that's all right. I saw you looked distressed and knew something must have happened. I am so glad." Then Mrs. Murray said a strange thing in her gratitude, for which she could never afterward account.

"Now we're neighbors, you must come in and see us sometimes," she said.

A flush of gratefulness came upon the other woman's face. "Oh, I'd like to so much, sometimes, if you will have me," she answered. "Living so much alone—one gets to feel so cloistered."

Odd Facts About Gold.

Few persons are familiar with the real color of gold, because it is seldom seen except when heavily alloyed, a state in which it is much redder than when it is pure.

The purest coins ever made were the \$50 pieces which were once in common use in California. Their coinage was abandoned because the loss by abrasion was so great and because their interior could be bored out and filled with lead. They were octagonal in shape and were the most valuable coins ever minted and circulated.

All gold is not alike when refined. Australian gold is distinctly redder than that taken in California. Moreover, placer gold is more yellow than that which is taken from quartz. This is one of the mysteries of metallurgy, because the gold in placers comes from that which is in quartz. The gold in the Ural mountains is the reddest in the world.

Health and Home

ICED DRINKS IN THE SUMMER

On a warm and sultry summer day, there is nothing more refreshing to the mind and to the body than an iced drink. Of course, when such drinks are being used, moderation should be practiced, because if taken in excess or too rapidly, they are liable to be injurious to the stomach. However, when taken in a sensible manner, they are refreshing and beneficial to the fatigued. In the manufacture of these drinks, care should be taken to avoid any combination that may be indigestible or hard to assimilate. The drink should be consumed in a slow and leisurely manner.

The greatest danger present in the use of iced drinks is the one that involves the use of ingredients that are possibly impure or contaminated in any way. This is very liable to happen if the juices that are used are allowed to stand until they become soured and unfit for use, or if the milk or other ingredient used is not strictly fresh. The predisposition of milk to spoil quickly at summer temperatures makes it oftentimes necessary to use evaporated milk, which after all is just pure fresh milk with more than half the water taken away. It is sterile and, therefore, always safe. For use in iced drinks, it is ideal.

Following are several formulas used in the manufacture of iced beverages. If these formulas are followed religiously, the results will be found to be very satisfactory.

Chocolate Malted Milk.

1 cup evaporated milk 3 teaspoonfuls cocoa
1 cup water 2 teaspoonfuls malted milk
Mix cocoa with water until syrup is obtained. Put all ingredients in Mason jar and shake thoroughly and serve with chilled ice.

Milk Punch.

1 cup evaporated milk 2 tsp. orange juice
Sugar to suit ½ cup water
1 cup tea Small stick cinnamon
2 tsp. lemon juice ½ cup fruit juice (currant or berry preferred)

Boil slowly the cinnamon, a lemon rind and orange rind in water for ten minutes. Strain and when cool add the other ingredients. Place in Mason fruit jar and shake well. Serve in tall glasses with chopped ice.

Egg Nog.

1 egg 1½ tbsp. powdered sugar
Pinch salt 2 tsp. fruit juice
½ cup cold evaporated milk Nutmeg gratings
¼ cup ice water
Add salt to egg white and beat to a stiff froth. Add the sugar, the well beaten yolk of the egg and the fruit juice and nutmeg. Fill glass with milk and cold water. Sprinkle top with chopped nuts.

KEEPING WELL

BOTTLING SUNLIGHT

DR. FREDERICK R. GREEN
Editor of "HEALTH"

WHETHER Moses or some other man wrote the book of Genesis is for Biblical experts and critics to decide. Whoever wrote it says that before any life appeared on the new world God said, "Let there be light." Whether God made the universe in six days, as the orthodox say or in six hundred million years, as geologists say, doesn't matter. That's a question of detail. What does matter is that the more man knows the more he realizes that before there is any life there must be light.

And in our universe the only light there is, is sunlight. Wood, candles, coal, oil, electricity, all depend on sunlight.

What sunlight is we do not know. It is not the simple thing it was thought to be for centuries. We know there are some rays in sunlight that are invisible to the human eye but which can be detected by special instruments. There are probably many more of whose existence we have not even guessed.

Neither do we know much about the effect of sunlight. But we do know something about the effect of the lack of sunlight.

Rickets is a common disease among children. Fifty per cent of all breast-fed babies and nearly 100 per cent of bottle-fed babies will develop it unless proper treatment is used. It is caused by lack of lime and phosphorus in the growing body. Cod liver oil has long been used in its treatment. Then it was found that cod liver oil, after being exposed to the sun, gave off ultra-violet rays which affect a photographic plate. So the oil must have absorbed these invisible rays and given them off to the body.

Then the investigators went a step further. They exposed other oils, such as cotton seed oil, to sunlight, and found that it, too, gave off ultra-violet rays after exposure and caused a rapid and complete cure when given to animals suffering from rickets.

Apparently the oil absorbs the sunlight and then gives off its healing rays after it is taken into the child's body.

And now Dr. Henry Steenbock, professor of agricultural chemistry at the University of Wisconsin, finds that placing food in the sunlight will give it growth-promoting qualities which it formerly did not possess. So the vitamins we have heard so much about may be simply the imprisoned sunshine which is found in leafy vegetables.

(© 1924, Western Newspaper Union.)

Few Now Have Faith in Legend of St. Swithin

July 15 is observed in England as St. Swithin's day. It is so called because of the legend connected with St. Swithin, bishop of Westminster, and tutor to King Alfred. At his request he was buried in the churchyard of the abbey, where "passers-by might tread on his grave, and where the rain from the eaves might fall on it." After his canonization in 865 A. D., it was resolved to remove his remains to the chancel, the customary burial place of

the bishops, and July 15 was appointed for the ceremony; but on that day and for forty days thereafter, St. Swithin, to testify to his displeasure, caused rain to fall so heavily that the monks abandoned their design as heretical and blasphemous. From this legend arose the popular superstition in England that if rain falls on July 15 it will continue to do so for the forty days succeeding. Careful records kept at Greenwich observatory for many years, however, show the superstition has no foundation in fact.—Kansas City Star.

Wagner, Mrs.

In calling for advertised letters applicants are requested to ask for letters for above date.

GEO. P. FORESMAN, P. M.

IT PAYS TO ADVERTISE

MANY KINDS OF VITAMINES

There are all sorts of vitamins. Scientists know very little about them, save that food would not be nourishing without them. Lack of one kind causes scurvy. Lack of another kind causes rickets. When rice husking machines first came into use the native rice eaters began dying with beri-beri, for the husks contained a vitamin necessary to health. Milk is rich in vitamins, but where did the cow find them? Prof. Drummond, of the University College, London, has discovered vitamin factories—in microscopic sea plants called diatoms. No animal can create any kind of vitamin, but copepods and cods eat welks—so cod liver oil is as full of vitamins as honey of pollen. But the professor leaves us in the dark as to how the vitamins find their way from cods to cows.—Los Angeles Times.

EASTERN STAR.

Regular meetings second and fourth Tuesday evenings of each month at 7:30 o'clock.

IRMA STEVENSON, W. M.
LUCY B. PRICE, Secretary.

AMERICA LEADS IN EDUCATING BLIND

German Woman Says Cleveland Methods Are Best.

Berlin.—America is leading the way in educational methods for the blind in the opinion of Miss Betty Hirsch, director of the School for the Blind founded during the World war by Germany's famous oculist, Geheimrat Silex.

"The city of Cleveland," she observes, "has found the ideal solution of the problem, in that education for the blind children is not carried on in special schools for the blind, the blind pupils are interspersed among the sighted children. This procedure is of the greatest benefit, not only to the blind children, but to the others as well, in that it accustoms them to getting along with their less fortunate fellow pupils and shows them that a blind student can do fully as well as a sighted one."

"The feeling of human pride is quite as pronounced with blind people as it is with those enjoying eyesight. Self-confidence can be encouraged among the blind only if they feel that they are being offered an opportunity to show that they can hold their own in competition with others. If the blind are separated from the sighted, this confidence can never be instilled in them. America is absolutely right in mixing the blind in with the sighted."

MASSACRE SURVIVOR

Jay O. Spencer of Joliet, Ill., a farmer, who is said to be the only living survivor of the massacre of soldiers under General Custer in the battle of the Little Big Horn. Spencer escaped the redskins by crawling into a hollow log.

French Plan Heavy Tax on Alien Land Holdings

Paris.—Foreigners purchasing real estate in France would be subject to a real estate sales tax four times as large as that levied upon natives if a bill now in the hands of the finance committee of the chamber is approved by the French parliament.

The present law imposes a tax of 13 per cent of the price paid, while the new bill would amend the law by making it 52 per cent when the buyer is a foreigner, "even when such a foreigner has a legal domicile in France."

"The depreciation of our currency has incited a certain number of capitalists belonging to countries favored on the international exchange market to invest their capital in France, in the hope of realizing heavy profits when the franc returns toward its par value," the preamble says.

"The franc having lost 80 per cent of its value, the English and the Americans are thus able to buy French property at prices much below those prevailing in 1914."

Health Report Warns of Anger While Eating

New York.—A happy outlook and a carefully balanced diet are two essentials set forth by the public health service as essential to good health. A warning against excitement or anger, especially at meal time, is sounded as detrimental to digestion. It is known, says the service, that certain kinds of emotions, especially the happy kind, help the proper functioning of the organs while others have an unfavorable influence.

"The energy or power we use for our activities comes from the food we eat," says a recent radio health talk bulletin. "Living as we do, on diets containing meat, milk, eggs, cereals, vegetables, fruits and greens, we get sufficient protein for tissue-building material, sufficient starches and sugar for energy, sufficient fats, mineral matters, vitamins and water to enable the body to work well and to keep its power to offset injurious agencies."

"The Store That Treats You Right."

4 big reasons
why you should
look in on H. B Colwell's
Semi-Annual Red Tag
Sale to-morrow—

You should come here to-morrow because here you will find merchandise that is as fair as the lillies.

You should come here to-morrow because our prices are above reproach---above comparison---but below competition.

You should come here to-morrow because your time is short and our Values are long.

And---lastly, you should come here to-morrow because this is where you will find the men who have looked around everywhere else.
